ILLINOIS CROP REPORT.

FOR

MAY 1, 1906.

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE
SPRINGFIELD, MAY 1, 1906.

The information contained in this report as to the acreage of crops and number of head of live stock was obtained from the reports of assessors made to this Department as required by law.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past twenty-nine years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number nearly six hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WINTER WHEAT.

The May 1 reports to this department show an encouraging prospect for winter wheat.

The area winter killed or destroyed by floods the past season was 6 per cent. of that seeded last fall, thus leaving 1,331,806 acres for harvest. The percentage destroyed, 6 per cent., was uniform in each division of the State. The May 1

169210

condition is not quite so flattering as that of last year, being 93 per cent. of a seasonable average. In northern Illinois the May 1 condition is reported as 92 per cent. of a seasonable average, in central Illinois 98 per cent. and in the southern division of the State 90 per cent.

Pope county reports some rust.

SPRING WHEAT.

There is a slight increase in the area devoted to spring wheat this year—in northern Illinois, which is the only division of the State reporting this crop, the area seeded as compared with 1905 is 101 per cent. and the May 1 condition 91 per cent of a seasonable average.

OLD WHEAT.

Of the 22,459,320 bushels of wheat raised in this State in 1905, 10 per cent. or 2,267,322 bushels are reported as in the producers' hands May 1.

The following table gives the amount of old wheat in first hands the first of May, since and including 1880:

YEAR PRODUCED.	Crop in bushels.	Per cent. crop on hand following May 1.	Amount crop in producers' hands following May 1	Surplus wheat above seed and consumption at harvest.	Deficit at harvest
1880.....	56,508,309	15	8,476,246	39,851,883
1881.....	22,374,163	13	2,924,039	5,765,414

1904.....	20,177,390	11	2,981,241	1,183,531
1905.....	22,459,320	10	2,267,322	1,184,844
Average	26,477,897	13	3,576,711	13,088,631	4,844,778

WINTER RYE.

Of the 85,690 acres sseeded to rye last fall 3 per cent. is reported destroyed, leaving 82,647 acres for harvest. The May 1 condition of this crop is 94 per cent. of a seasonable average. Northern Illinois reports the May 1 condition 90 per cent. of a seasonable average, central Illinois 99 per cent. and the southern division of the State 93 per cent.

Boone county reports a slight disturbance with fly.

OATS.

Owing to the late spring and unfavorable weather at seeding time, a great decrease—12 per cent.—is noted in the area seeded to oats as compared with 1905.

In northern Illinois the average this year as compared with 1905 is 99 per cent, in central Illinois 86 per cent. and in the southern division of the State 78 per cent.

The May 1 condition is but 83 per cent of a seasonable average. Northern Illinois reports the May 1 condition 92 per cent, central Illinois 81 per cent and southern Illinois 75 per cent.

BARLEY.

The area devoted to this crop in northern Illinois this year is 98 per cent of normal and the May 1 condition 88 per cent.

No barley is reported from central Illinois and but from but one county, Hamilton, in the southern division of the State, which reports the area as 100 per cent of normal and the May 1 condition 98 per cent of a seasonable average.

OLD CORN.

A little more than the usual proportion of old corn is in producers' hands May, 1; 31 per cent of the entire crop or 95,836,758 bushels.

In northern Illinois there were 44,424,811 bushels on hand, in central Illinois 29,819,446 bushels and in the southern division of the State 11,592,501 bushels.

Livingston county reports the largest amount of corn in first hands May 1. This county produced the largest corn crop of any county in the State last year, 11,203,783 bushels. Of this amount 43 per cent., or 4,817,626 bushels, is in the producers' hands at this date.

In northern Illinois the per centage of the entire crop unsold on May 1 was 37 per cent., in central and southern Illinois 27 per cent, respectively.

CROP REPORT.

The following table gives the amount of old corn in the producers' hands May 1, the past twenty-seven years, as well as the extent of the crop produced each year:

YEAR PRODUCED.	Crop.	Per ct. corn on hand following May 1.	Bushels corn in producers' hands following May 1.
1879	305,913,277	32	99,229,889
1880	250,697,036	28	71,929,343
1881	174,491,706	21	37,445,964
1882	179,471,729	24	43,450,857
1883	186,583,558	21	39,478,621
1884	207,556,662	24	50,102,264
1885	230,922,298	24	57,047,027
1886	182,755,053	24	43,346,028
1887	129,537,603	19	23,573,279

1903	275,735,599	30	83,813,726
1904	281,058,931	26	73,777,043
1905	309,316,053	31	95,836,758
Average	230,123,128	30	68,762,660

MEADOWS.

The area in meadows is a little less than last year, being 94 per cent. as compared with 1905.

The May 1 condition of meadows is 94 per cent of normal.

The late spring has retarded the growth of meadows considerably in northern Illinois, which reports the May 1 condition as 92 per cent. Central Illinois reports 95 per cent., and the southern division of the State 94 per cent.

PASTURES.

There is a deficiency of 3 per cent. in the area devoted to pastures this year as compared with 1905, being 97 per cent of normal.

In northern Illinois the area is 98 per cent, and in central and southern Illinois respectively 97 per cent as compared with last year.

The late spring has been unfavorable for the growth of pastures, the May 1 condition being but 93 per cent of a seasonable average.

In northern Illinois the May 1 condition is reported as 92 per cent, and in both the central and southern divisions of the State as 94 per cent.

SPRING PLOWING.

About two-thirds of the entire amount of spring work is usually completed by May 1, but owing to the late spring and condition of the soil, a little less than one-half the work is reported as finished on May 1.

Northern Illinois reports 63 per cent of the work completed, central Illinois 39 per cent, and southern Illinois 44 per cent.

The soil is reported as being very "cloddy" in many counties in the central division and "heavy" in southern Illinois.

LIVE STOCK.

Horses.

The number of horses reported on May 1, is 94 per cent, as compared with 1905.

Distemper is reported from Carroll, DuPage, Livingston, Mercer, Cass, Douglas, Edgar, McLean, Shelby, Franklin and Johnson counties. Colic is reported from Lake and Pulaski. Vermilion county reports lambers, and Will county spinal meningitis.

Jefferson and Richland counties report many colts lost at foaling time.

With the above exceptions, the general condition of horses is good, being 97 per cent of normal.

Mules.

There is a deficiency of 5 per cent in the number of mules in the State this year as compared with last. Their May 1 condition is 99 per cent of normal.

Cattle.

The number of cattle reported this year is 94 per cent as compared with last year.

Their May 1 condition is 96 per cent of normal, being 98 per cent in northern Illinois, 94 per cent in central Illinois and 95 per cent in the southern division of the State.

Fayette county reports many deaths among cows at calving time.

Dairy Cows.

In northern Illinois the number of dairy cows reported this year is 98 per cent as compared with 1905, in central Illinois 96 per cent and in southern Illinois 97 per cent. Their May 1 condition is 98 per cent of normal in northern Illinois, 95 per cent in central Illinois and 96 per cent in the southern division of the State.

Hogs.

The number of hogs on hand May 1, as compared with last year, is 89 per cent. The following counties report an increase over last year, viz.: Scott, Clinton, Effingham, Marion, Union and Wayne. The May 1 condition of hogs is 99 per cent of normal in northern Illinois, 97 per cent in central Illinois and 98 per cent in the southern division of the State.

Carroll, Adams, and Macoupin counties report great loss of spring pigs.

Hog cholera is reported from Scott and Hamilton counties.

Sheep.

In northern Illinois the number of sheep this year as compared with 1905 is 99 per cent and their May 1 condition 99 per cent. In central Illinois their number is 93 per cent and their condition 97 per cent. In the southern division of the State the number reported is 93 per cent compared with that of last year and their May 1 condition 96 per cent. There is no disease reported among sheep.

FRUIT.

The fruit prospect on May 1, is most encouraging. With the exception of peaches, which will be only a half crop in southern Illinois, the outlook is good for a full crop of fruit.

GENERAL FARM NOTES.

Bees are reported as having suffered greatly the past winter, many swarms dying of starvation.

Cholera is reported among poultry in Cass and a tendency among all farm animals to mange is reported from Sangamon county.

On account of decrease of area devoted to oats, owing to late spring and unfavorable weather at planting time, there is quite an increase reported in the corn area.

Cook county reports increase in area of Irish potatoes. Bond, Clay, Adams and Jasper report increase in area devoted to cow peas. Less sorghum is reported in Bond county.

WAGES PAID FARM HANDS.

From every section of the State complaint is made as to the scarcity of good farm hands. The shortage this year is 12 per cent as compared to an average and there is much dissatisfaction as to the quality of the help.

There is not much difference between the wages paid this year and last, but what difference there is, is in most cases an increase.

The average wages paid farm hands during the past twenty-seven years is given in the following table:

DIVISION.	PER DAY		PER MONTH.	
	With Board.	Without Board.	With Board.	Without Board.
Northern	\$1 00	\$1 35	\$20 55	\$28 30
Central	90	1 15	18 40	24 80
Southern	65	90	14 95	20 95
Average	\$0 85	\$1 15	\$17 95	\$24 70

CROP REPORT.

9

The wages paid farm help in the three divisions of the State, during the past twenty-seven years, is given in the following tables:

Northern Division.

YEAR.	PER DAY.		PER MONTH.	
	With Board.	Without Board.	With Board.	Without Board.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent., is recorded 110; a decrease of five per cent. is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,
Secretary.

ACREAGE AND CONDITION OF WINTER WHEAT.

AVERAGE CONDITION MAY 1.

ILLINOIS CROP REPORT

FOR

JUNE 20, 1906.

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE
SPRINGFIELD, JUNE 20, 1906.

The information contained in this report was obtained from the reports of correspondents mailed to this office the twentieth of June.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past twenty-nine years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number nearly six hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

CORN.

A decrease of 2 per cent in the area devoted to corn is reported this year. Northern Illinois reports 97 per cent of an area compared with 1905, central Illinois 101 per cent and the southern division of the State 96 per cent.

The June 20 condition of the crop in northern Illinois is reported as 94 per

100215

CROP REPORT.

cent of a seasonable average, in central Illinois 89 per cent and but 81 per cent in the southern division of the State.

Cool weather greatly retarded the growth of corn in many counties, while a severe drought is responsible for the condition of corn in southern Illinois.

The quality of seed corn is 99 per cent of an average, an increase of 10 points over that of June 20, 1905. In northern and central Illinois it was 100 per cent of an average and 98 per cent in the southern division of the State.

Cut, wire, web, grub and army worms, root lice, ants and moles are reported as working on corn in many counties of the State, though but few counties report serious injury from same.

The earliest appearance of corn above ground was April 10, which date was reported from Iroquois, Mercer, Adams, Hancock, Edwards and St. Clair counties, but most of it appeared the first 10 days in May.

BROOM-CORN.

The area in broom-corn is 90 per cent as compared with 1905. In northern Illinois the area is 100 per cent, in central Illinois 93 per cent and in southern Illinois 76 per cent.

The June 20 condition of this crop is 100 per cent of a seasonable average in northern Illinois, 90 per cent in central Illinois and 88 per cent in the southern division of the State.

SORGHUM.

The area in sorghum as compared with last year is 90 per cent. Northern Illinois reporting 93 per cent, central Illinois 92 per cent and southern Illinois 85 per cent.

The June 20 condition in northern Illinois is 94 per cent of normal, 93 per cent in central Illinois and 82 per cent in the southern division of the State.

WINTER WHEAT.

Since the May 1 report there has been a decrease of 2 points in the condition of winter wheat. In northern and southern Illinois it is 88 per cent of a seasonable average and 96 per cent in central Illinois, a State average of 91 per cent.

June 1 was the earliest date harvest commenced.

Hessian fly is reported in wheat from Hamilton county and rust from Menard county.

SPRING WHEAT.

The June 20 condition of spring wheat is 84 per cent of an average, a decrease of 7 points since the May 1 report.

Very few counties make a report on spring wheat.

OATS.

There is a decrease of 17 points in the condition of oats since the May 1 report.

In northern Illinois the June 20 condition is 77 per cent of a seasonable average, in central Illinois 71 per cent and but 50 per cent in the southern division of the

State. With but few exceptions, oats are reported from every county as late and very short.

A protracted drought which was general throughout the State is responsible for the poor condition of this crop.

RYE.

The condition of rye June 20 showed a decrease of 5 points since the May 1 report, being but 89 per cent of a seasonable average.

In northern Illinois the condition is reported as 87 per cent, in central Illinois 94 per cent and in southern Illinois 85 per cent.

Fly in rye is reported from Boone county.

BARLEY.

In northern Illinois the June 20 condition of this crop is 87 per cent of a seasonable average.

In Jersey, the only county in central Illinois reporting barley it is 80 per cent and 87 per cent in the southern division of the State, where but three counties report this crop.

MEADOWS.

A decrease of 6 per cent is noted in the area devoted to meadows as compared with 1905.

Northern Illinois reports a decrease of 5 per cent and central and southern Illinois, respectively, of 6 per cent.

The June 20 condition of meadows is 63 per cent of a seasonable average in northern Illinois, 74 per cent in central Illinois and 57 per cent in southern Illinois.

Meadows are reported as very short and poor, due to the drought which was reported from nearly every county in the State.

CLOVER.

The area devoted to clover this year is estimated at 20 per cent less than a year ago.

In northern Illinois the area is 81 per cent as compared with 1905, 82 per cent in central Illinois and 78 per cent in the southern division of the State.

The June 20 condition of clover is 68 per cent in northern Illinois, 81 per cent in central Illinois and 69 per cent in southern Illinois.

Lee county reports clover meadows as badly winter-killed.

HUNGARIAN AND MILLET.

An increase is noted in the area of these grasses this year. In northern Illinois the area as compared to 1905 is 94 per cent, in central Illinois 101 per cent and 103 per cent in the southern division of the State.

PASTURES.

The area devoted to pastures this year is 3 per cent less than a year ago.

In northern Illinois the area is 98 per cent as compared with 1905, and 97 per cent in the central and southern divisions of the State.

CROP REPORT.

In northern Illinois the June 20 condition is 74 per cent of a seasonable average, 85 per cent in central Illinois and 71 per cent in southern Illinois.

Pastures have been seriously injured by drought.

IRISH POTATOES.

There is a decrease of 1 per cent in the area devoted to Irish potatoes this year in northern and central Illinois and 5 per cent in the southern division of the State.

The June 20 condition was 91 per cent of a seasonable average in northern Illinois, 92 per cent in central Illinois and 82 per cent in southern Illinois.

Potato bugs are reported from Cook, Henry, Jo Daviess, Stark and Winnebago counties.

SWEET POTATOES.

Northern Illinois reports the same area in sweet potatoes as in 1905, viz.: 94 per cent, central Illinois 96 per cent and southern Illinois 92 per cent.

The June 20 condition is 91 per cent of normal in northern Illinois, 92 per cent in central Illinois and 85 per cent in southern Illinois, a State average of 89 per cent.

Cut worms are injuring sweet potatoes in Mason county.

FIELD BEANS.

The area of field beans is reported as 100 per cent of an average in northern and central Illinois respectively, and 92 per cent in southern Illinois.

The June 20 condition of this crop is 93 per cent of normal.

In northern Illinois it is 95 per cent, in central Illinois 97 per cent and 88 per cent in the southern division of the State.

COW PEAS.

The area in cow peas as compared with last year was 102 per cent, in northern Illinois, 115 per cent, in central Illinois, and 89 per cent in the southern division of the State.

TOBACCO.

Jo Daviess is the only county in the northern division of the State, reporting tobacco,—in which county the area is the same as last year and the June 20 condition as 95 per cent of normal.

No tobacco is reported from central Illinois.

The southern division of the State reports a deficiency of 11 per cent in the area of tobacco as compared with 1905 and the June 20 condition as 89 per cent of a seasonable average.

FRUIT.

Cherries.

Northern Illinois reports the yield of cherries as 94 per cent of normal, central Illinois 113 per cent and southern Illinois 96 per cent, a State yield of 101 per cent.

Strawberries.

In northern and southern Illinois the yield of strawberries was 82 per cent as compared to an average and 90 per cent in central Illinois.

Raspberries.

The yield of raspberries this year was 90 per cent of normal, being 87 per cent in northern Illinois, 94 per cent in central Illinois and 90 per cent in the southern division of the State.

Gooseberries.

In northern Illinois the yield of gooseberries was 88 per cent of normal, in central Illinois 93 per cent and in southern Illinois 82 per cent, a State average of 88 per cent.

Currants.

There was 85 per cent of an average yield of currants raised in Illinois this year. Northern Illinois reports 85 per cent, central Illinois 91 per cent and southern Illinois 80 per cent.

Vineyards.

The area reported in vineyards this year is 97 per cent as compared with 1905. In northern Illinois the June 20 condition is 88 per cent of normal, in central Illinois 93 per cent and in the southern division of the State 94 per cent.

Other Fruit.

Blight is reported as injuring apples in St. Clair county. With but few exceptions, most encouraging reports of the fruit crop have been made by our crop correspondents.

YOUNG LIVE STOCK.**Pigs.**

The number of pigs farrowed this year is 14 per cent less than in 1905. Northern Illinois reports 87 per cent, central Illinois 84 per cent and southern Illinois 86 per cent.

Northern Illinois reports the June 20 condition as 97 per cent of normal and central and southern Illinois 96 per cent respectively.

Lambs.

The number of spring lambs reported this year is 7 per cent less than in 1905. In northern Illinois the number is 96 per cent of that of 1905, in central Illinois 93 per cent and in the southern division of the State 90 per cent.

The condition of lambs is good, being 98 per cent of normal. In northern Illinois the June 20 condition is 99 per cent, in central Illinois 98 per cent and in southern Illinois 97 per cent.

Calves.

Northern and central Illinois report the number of calves as 96 per cent of normal and southern Illinois 95 per cent.

Their June 20 condition in northern Illinois is 98 per cent of normal, in central Illinois 99 per cent and southern Illinois as 97 per cent.

Colts.

The proportion of colts foaled this year as compared to 1905 was 94 per cent in northern Illinois and 98 per cent in the central and southern divisions of the State.

Their June 20 condition is 98 per cent of normal in northern and central Illinois and 97 per cent in the southern division of the State.

Several good brood mares died at foaling time in McHenry county.

The average value of colts at weaning time is \$43, northern Illinois reporting \$40, central Illinois \$47 and southern Illinois \$43.

The number of colts lost at meaning time was 6 per cent in each division of the State.

The average cost of service of stallions was \$13 in northern Illinois, \$12 in central Illinois and \$10 in the southern division of the State.

The health of all farm animals is reported as excellent.

WOOL.

The wool clip of 1906 was 3 per cent less than that of last year. In the northern division of the State it was 98 per cent, in the central division 97 per cent and in the southern division 96 per cent.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decidt as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represnt a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent., is recordtd 110; a decrease of five per cent. is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men wh realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for the term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,

Secretary.

ILLINOIS CROP REPORT

FOR

AUGUST 1, 1906.

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE
SPRINGFIELD, AUGUST 1, 1906.

The information contained in this report was obtained from the reports of correspondents mailed to this office the first of August.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past twenty-nine years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number nearly six hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WHEAT.

The area seeded to wheat for the crop of 1906 was 1,480,308 acres, all but 62,803 acres being winter wheat. Two per cent of the winter wheat area was winter-killed or destroyed by floods, leaving 1,447,642 acres of wheat (spring and winter) for harvest.

The average yield per acre, 20 bushels, is higher than for several years. The

CROP REPORT.

total yield amounted to 28,458,122 bushels. The ruling price of wheat August 1. was 70 cents per bushel, the total value of the crop at this price being \$19,782,474.

The condition of this crop is excellent, no reports of insect injury having been received.

The following table gives the area, yield and value of the wheat crop of the State during the past forty-six years.

WHEAT (SPRING AND WINTER.)

YEAR	Number of acres harvested.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

WHEAT CONSUMPTION.

In estimating the amount of wheat required in the State for seed and bread, it is necessary to consider the entire area seeded instead of that harvested, as the

amount required for seed is based on the area seeded last year which was 1,480,308 acres.

As one and one-third bushels per acre is used for seed it will require 1,973,740 bushels to seed next years crop.

Allowing 4 bushels per capita for food, it takes, according to the 1900 census, which gives Illinois 4,821,550 inhabitants, 19,287,000 bushels for that purpose, so that 21,260,740 bushels will be required for home use.

As the total yield amounted to 28,458,122 bushels, there remains 7,197,382 bushels for export.

OATS.

A decrease of 224,467 acres was noted in the area devoted to oats this year, due to the late, wet spring, which prevented their being sown at the proper time.

Northern Illinois reports 1,811,063 acres, central Illinois 907,474 acres and southern Illinois 299,758 acres, a total of 3,018,295 acres.

The total yield of oats for 1906 is 90,971,381 bushels.

The average yield per acre for the State is 30 bushels.

Northern Illinois reporting an average of 32 bushels, central Illinois 30 bushels, and southern Illinois but 18 bushels per acre.

The prevailing price of oats August 1 was 30 cents per bushel, making the value of the crop at that price \$27,462,112.

Rust in oats was reported from JoDaviess, Kendall, Lee, Livingston, Peoria, Warren, Woodford, Mason, Tazewell, Monroe and St. Clair counties.

The straw as a rule was rather short, rendering it very difficult to cut.

CROP REPORT.

The following table gives the area, yield and value of the oats crop of the State during the past forty-six years.

Year.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of the oat crop in each county in the State this year.

RYE.

An even smaller area than in 1905 is reported in rye this year, only 80,489 acres, almost all in the northern division of the State.

The average yield per acre was 17 bushels and the total yield 1,331,818 bushels.

The August 1 price was 54 cents per bushel, making the total value of the crop \$718,376.

The following table gives the area, yield and value of the past forty-six rye crops grown in the State.

Year.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of rye in each county in the State.

BARLEY.

There is an increase of 1,411 acres in the area devoted to barley over that of 1905, the total area being 31,074 acres.

The average yield per acre of 28 bushels was about the normal yield, and gave a total barley crop of 856,913 bushels.

The ruling price August 1 was 39 cents, making the value of the crop \$337,547.

CROP REPORT.

The following table gives the area, yield and value of the last forty-six barley crops produced in this State.

YEAR.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

In a table published elsewhere in this report will be found the area, yield and value of the barley crop in the State by counties.

HAY.

A decrease is noted in the area of meadows this year, the total area being 2,411,902 acres.

Northern Illinois reports 1,033,553 acres, central Illinois, 783,865 acres and southern Illinois 514,484 acres.

Meadows suffered greatly from the drought, and the average yield per acre

of 93 hundredths of a ton is with two exceptions, the smallest yield per acre ever known in the State.

The total yield amounted to 2,236,175 tons, of which 943,740 tons were produced in northern Illinois, 797,973 tons in central Illinois and 494,462 tons in the southern division of the State.

The average price per ton, \$10.10 is unusually high and the total value of the crop at that price amounts to \$22,712,456.

The yield of clover was but 1 ton per acre, and its August 1 condition was 91 per cent of normal.

Lee and McHenry counties report clover as badly winter-killed.

The following table gives the area, yield and value of the last forty-six hay crops of the State.

Year.	Number of acres.	Average yield per acre—tons.	Tons produced.	Price per ton.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production	Profit.	Loss.

CORN.

In northern Illinois the area devoted to corn this year is 3,034,922 acres, in central Illinois 3,422,860 acres and in the southern division of the State, 1,152,012 acres, making a total acreage of 7,609,794 acres.

The August 1 condition of corn was but 81 per cent of a seasonable average, which is a decrease of 7 points since the June 20 report was issued and 15 points lower than the August 1 condition of 1905.

The report of great damage to the growing crop from the excessive drought of 60 days prior to August 1, is general from almost every country.

Corn is reported as "firing" in Bureau, Livingston, Peoria, Stark, Woodford, Cass, Christian, Ford, Morgan, Sangamon, Schuyler and Franklin counties.

Some damage has been done by grub worms in Lake, Peoria, Adams, DeWitt, McLean and Moultrie counties, also by lice in Peoria, Montgomery, Schuyler, Shelby, Bond and Clay counties. Moultrie county reports a green bug as injuring corn.

BROOM-CORN.

The August 1 condition of broom-corn was 97 per cent of a seasonable average in northern Illinois, 83 per cent in central Illinois and 80 per cent in the southern division of the State, a State average of 87 per cent.

SORGHUM.

The August 1 condition of sorghum was 92 per cent of a seasonable average in northern Illinois, 85 per cent in central Illinois and 84 per cent in the southern division of the State, the State average being 87 per cent.

PASTURES.

There is a decrease of 42,479 acres in the area of pastures this year, the total area of same being 4,243,817 acres. This decrease is mostly in the central division of the state.

The August 1 condition of pastures is but 66 per cent of a seasonable average, a decrease of 30 points from the August 1, 1905 condition.

In northern and central Illinois the condition is reported as 65 per cent of an average and 68 per cent in the southern division.

Pastures are reported as badly damaged by the long continued drought and in many counties farmers are feeding cattle hay and green corn to supplement the pasturage.

IRISH POTATOES.

Irish potatoes have depreciated slightly in condition since the June 20 report, their August 1 condition being 83 per cent of a seasonable average in the northern and southern divisions of the State and 85 per cent in central Illinois, a State average of 84 per cent.

SWEET POTATOES.

The August 1 condition of this crop was 90 per cent of normal in northern Illinois, 88 per cent in central Illinois and 85 per cent in the southern division of the State.

BUCKWHEAT.

A deficiency of 14 per cent in the area devoted to buckwheat as compared with 1905, is noted.

In the northern division of the State, the August 1 condition of buckwheat is 85 per cent of a seasonable average, 75 per cent in central Illinois, and 84 per cent in southern Illinois, an average condition for the State of 81 per cent.

TURNIPS AND OTHER ROOT CROPS.

In northern Illinois the area in turnips and other root crops is 96 per cent of that of 1905, 90 per cent in central Illinois and 88 per cent in the southern division of the State.

The August 1 condition of these crops was 83 per cent of normal in northern Illinois, 81 per cent in central Illinois and 82 per cent in southern Illinois, the State average being 82 per cent.

TOBACCO.

But two counties in northern Illinois. Boone and JoDaviess, report on this crop, where its August 1 condition was 100 and 97 per cent respectively.

No area is reported from central Illinois.

In the southern division of the State, the August 1 condition of tobacco was 89 per cent of normal.

CASTOR BEANS.

The August 1 condition of castor beans was 82 per cent of a seasonable average, being 100 per cent in northern Illinois, 50 per cent in central Illinois and 96 per cent in the southern division of the State.

FIELD BEANS.

In northern Illinois the August 1 condition of field beans was 94 per cent of normal, 88 per cent in central Illinois and 86 per cent in southern Illinois, the State average being 89 per cent.

COW PEAS.

The August 1 condition of cow peas was 90 per cent of a seasonable average, being 97 per cent in northern Illinois, 87 per cent in central Illinois and 85 per cent in the southern division of the State.

FRUIT.**Apples.**

The prospect for the apple crop is most favorable, the August 1 condition being 80 per cent of normal, an increase of 25 points over that of last year.

Northern Illinois reports 70 per cent, central Illinois 86 per cent and the southern division of the State 83 per cent.

Apples are reported as falling in Henry, Iroquois, Warren and Cass counties.

Peaches.

The August 1 condition of peaches was 92 per cent of normal in northern Illinois, 89 per cent in central Illinois and 50 per cent in southern Illinois, the State average of 77 per cent being 35 points better than on August 1, 1905.

Pears.

The August 1 condition of pears was 82 per cent of a seasonable average in northern Illinois, 78 per cent in central Illinois and 55 per cent in the southern division of the State, a State average of 72 per cent.

Plums.

Northern Illinois reports the August 1 condition of plums as 71 per cent of normal, central Illinois 90 per cent and southern Illinois 75 per cent, a State average of 79 per cent.

Grapes.

The prospect for grapes is reported from each division of the State as being favorable for 93 per cent of an average yield.

Blackberries.

The blackberry crop this year was 92 per cent of an average yield.

In northern Illinois the yield was 90 per cent, in central Illinois 91 per cent and 96 per cent in the southern division of the State.

Quinces.

But few quinces are raised in Illinois, and their August 1 condition is encouraging for 78 per cent of the usual crop.

Northern Illinois reports 92 per cent, central Illinois 78 per cent and the southern division of the State 65 per cent.

LIVE STOCK.

Aside from the fact that stock generally is rather thin from lack of pasture, it is in good condition, but few cases of disease being reported.

Hog cholera is reported from Kendall, Adams, Fulton and Monroe counties. Pink-eye is reported from Shelby county.

Distemper is reported from Adams, Cass, Greene, Schuyler, Tazewell, Monroe and Richland counties.

DRAIN TILE.

So far as can be ascertained, there are now 731,529,732 feet of drain tile in the State, which gives an average of 26 feet to each acre of cultivated land in Illinois.

In northern Illinois the average number of feet per acre is 40, in central Illinois 30, while in the southern division of the State few counties average as much as 1 foot per acre.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent, is recorded 110; a decrease of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for the term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,
Secretary.

ILLINOIS CROP REPORT

FOR

DECEMBER 1, 1906.

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE
SPRINGFIELD, December 1, 1906.

The information contained in this report as to the acreage of crops and number of head of live stock was obtained from the reports of assessors made to this Department as required by law.

The data in regard to yield per acre, price of crops and value of crops and live stock was obtained from crop correspondents, who number three hundred, and represent every section of the State.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past twenty-nine years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

CROP REPORT.

WINTER GRAIN.

Wheat.

A decrease of 1 per cent is noted in the area seeded to wheat this fall, as compared with 1905, 1,371,794 acres being reported.

Northern Illinois reports 30,432 acres, central Illinois 638,147 acres and the southern division of the State 703,215 acres.

The December 1 condition of the growing crop is 96 per cent. of normal, being 99 per cent. in northern Illinois, 97 per cent. in central Illinois and 92 per cent. in the southern division of the State.

Hessian fly in wheat is reported from Scott, Bond, Franklin and Washington counties.

Rye.

A decrease of 6 per cent. in the area seeded to rye, as compared with 1905, is noted, but 73,079 acres being reported.

Northern Illinois reports 59,580 acres, central Illinois 9,936 acres and the southern division of the State 3,563 acres.

The condition of this crop December 1, is 97 per cent. of normal, being 96 per cent. in northern Illinois, and 98 per cent. in both the central and southern divisions of the State.

Corn.

The area devoted to corn this year, 7,622,000 acres is 1 per cent. less than in 1905, when 7,698,000 acres were reported.

Northern Illinois reports 3,047,308 acres, central Illinois 3,422,242 acres and the southern division of the State 1,152,012 acres.

The average yield per acre in northern Illinois is 39 bushels, in central Illinois 38 bushels and in the southern division of the State 31 bushels, a State average of 37 bushels.

The total corn crop of the State in 1906 amounted to 284,077,000 bushels, of which 119,943,000 bushels were produced in northern Illinois, 123,548,000 bushels in central Illinois and 35,586,000 bushels in the southern division of the State.

The ruling price of corn December 1 was 36 cents per bushel, the total value of the crop at this price being \$103,489,000.

According to reports corn was damaged greatly the past season by dry rot, root lice, grub worms, mould and excessive rains, the quality of the grain being 91 per cent. of normal.

Root lice injured corn in Knox, Marshall, Peoria, Stark, Warren, Christian, Coles, Douglas, Hancock, Logan, McLean, Montgomery, Morgan, Shelby, Clay and Fayette counties. Grub worms are reported from Kane, Knox, Peoria, Winnebago, DeWitt, Douglas, McLean, Sangamon and Schuyler counties.

In several counties damage was done by an early frost, while excessive rains are reported from DuPage, Montgomery, Clay, Fayette, Franklin, Johnson, Pulaski, St. Clair, Wabash and White counties.

From Iroquois, Kendall, Woodford, Adams, Coles, Christian, DeWitt, Douglas, Ford, Macon, McLean, Moultrie, Piatt, Sangamon, Scott, Vermilion, Crawford, Hamilton, Pope and St. Clair counties dry rot is reported, while DeKalb, Kendall, Livingston, Peoria, Putnam, Tazewell and Whiteside counties report mouldy corn.

CROP REPORT.

5

The area, yield and value of the corn crop of the State for the past forty-seven years is given in the following table:

YEAR.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel—cents.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.
1860..	3,839,159	30	115,174,770	42½	\$48,944,277	\$12 74	\$10 50	\$40,311,169	\$8,633,108

CROP REPORT.

BROOM-CORN.

There is a decrease of 6 per cent. in the area of broom-corn as compared with 1905, 8,498 acres being reported.

The average yield per acre was 1000 pounds, the total yield being 8,118,000 pounds.

The ruling price December 1, was \$96 per ton, the total value of the crop being \$389,665.

The following table gives the area, yield and value of the broom-corn crop of Illinois since 1876:

YEAR.	Acreage.	Av. yield per acre— lbs.	Total yield— lbs.	Price per ton.	Value of crop.
1877.....	14,566	458	6,674,747	\$71 20	\$237,594
1878.....	18,258	614	11,218,168	49 50	277,645
1879.....	17,664	632	11,161,238	86 75	484,195

SORGHUM.

A decrease of 678 acres is noted in the area devoted to sorghum this year, but 4,281 acres being reported. The average yield per acre was 93 gallons, the total yield being 398,300 gallons.

The ruling price December 1 was 45 cents per gallon, the total value of the crop being \$171,837.

The following table gives the area, yield and value of the sorghum crops produced in the State since 1876:

YEAR.	Acreage.	Av. yield per acre— bushels.	Total number of bushels.	Price per bushel.	Value of crop.
1877.....	19,335	63	1,237,164	\$0 42	\$515,409

CROP REPORT.

BUCKWHEAT.

A slight decrease in the area devoted to buckwheat is noted this year, the total area being 1,975 acres, a decrease of 158 acres from the 1905 area.

The average yield per acre was 12 bushels and the total yield 23,084 bushels.

The ruling price December 1 was 75 cents per bushel, making the total value of the crop \$17,166.

The following table gives the area, yield and value of the buckwheat crop in this State for the past thirty years:

YEAR.	Acreage.	Av. yield per acre— bushels.	Total number of bushels.	Price per bushel.	Value of crop.
1877.....	15,880	13	207,693	\$0 73	\$151,612

TIMOTHY SEED.

There were 58,576 bushels of timothy seed produced in 1906. The average price per bushel was \$1.95, the value of the crop at this price being \$113,810.

The following table gives the amount and value of the crop in this State since and including 1877:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	483,571	\$1 25	\$604,464
1878.....	261,559	1 25	326,949

CROP REPORT.

CLOVER SEED.

The amount of clover seed harvested this year was 40,189 bushels.

The average price per bushel was \$6.75, and the total value of the crop \$270,932.

In the following table will be found the yield and value of the crop of clover seed for 1906, as compared with the twenty-nine years preceding:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	64,686	\$4 80	\$310,493
1878.....	77,388	4 05	313,421

HUNGARIAN AND MILLET SEED.

There were 30,550 bushels of Hungarian and millet seed produced in 1906.

The ruling price December 1, was 90 cents per bushel, the value of the crop at this price being \$26,936.

The following table gives the yield and value of this crop since 1876:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	17,463	\$0 65	\$10,701
1878.....	26,787	55	14,733

BEANS.

Only 1,058 acres are reported as devoted to beans in 1906.

The average yield per acre was 15 bushels and the total yield 16,281 bushels.

The ruling price December 1 was \$2.00 per bushel, the total value of the crop being \$32,934.

The following table gives the area, yield and value of the 1906 crop of beans, together with those of twenty-nine years preceding:

YEAR.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	1,545	13	19,955	\$1 50	\$29,916

CASTOR BEANS.

The area devoted to castor beans is the same as last year, 7,151 acres being reported.

The average yield per acre was 10 bushels, the entire yield being 74,070 bushels.

The total value of the crop at the ruling price December 1, was \$98,223, an average price of \$1.35 per bushel.

In the following table is given the area, yield and value of the thirty crops of castor beans:

YEAR.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	4,503	3¼	17,538	\$1 10	\$18,512

TOBACCO.

But 2,787 acres are reported as devoted to tobacco, of which 2,610 acres are in the southern division of the State.

The average yield per acre was 892 pounds, the total yield being 2,487,500 pounds.

The total value of the crop at the ruling price December 1, was \$232,504, an average price per pound of 9 cents.

The following table gives the area, yield and value of the crop in this State since 1876:

YEAR.	Acreage.	Av. yield per acre— bushels.	Total number of pounds.	Price per pound.	Value of crop.
1877.....	12,320	640	7,885,586	\$0 08	\$638,848

PASTURES.

A decrease of 3 per cent is noted in the area of pastures as compared with the 1905 area, 4,243,030 acres being reported.

The value per acre was \$4.25. In northern and central Illinois where almost seven-eighths of the pasture lands are located, the value is \$4.60 and \$4.10 respectively, while in southern Illinois it is but \$3.05 per acre.

The total value of pastures this year was \$17,945,493.

Pastures were injured by grub worms in Warren and Winnebago counties.

The following table gives the area and value of pastures for thirty years past:

YEAR.	Acreage.	Value per acre.	Value of crop.
1877.....	4,367,603	\$3 38	\$14,764,112

IRISH POTATOES.

There was a slight increase in the area devoted to Irish potatoes this year, 96,554 acres being reported.

The average yield of 98 bushels per acre shows a decided increase over that of last year, when but 75 bushels per acre was reported.

The average price per bushel was 60 cents and the total value of the crop, 9,448,314 bushels, was \$5,555,817.

The following table gives the area, yield and value of the Irish potato crops of the State since 1859:

YEAR.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.
1860...	69,225	80	5,540,300	\$0 31	\$1,717,520	\$24 80	\$20 55	\$1,422,574	\$294,946

SWEET POTATOES.

The area devoted to sweet potatoes in 1906 was 2,851 acres.

The total yield was 238,975 bushels, an average of 84 bushels per acre.

The ruling price December 1 was 80 cents per bushel, the total value of the crop being \$191,725.

The following table gives the area, yield and value of the sweet potato crop of the State for the past thirty years:

YEAR.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	2,355	63	148,270	\$0 85	\$126,092

TURNIPS AND OTHER ROOT CROPS.

A decrease of 9 per cent. is reported in the area devoted to turnips and other root crops this year, as compared with 1905, but 431 acres being reported.

The average value per acre is \$170.32 and the total value \$73,415.

The average yield of turnips per acre was 122 bushels.

The following table gives the acreage and value of turnips and other root crops grown in the State during the past thirty years:

YEAR.	Acreage.	Value per acre.	Value of crop.
1877.....	7,056	\$39 55	\$279,136

OTHER CROPS NOT NAMED.

There are a number of crops raised in this State which are cultivated only in limited localities, and are not of sufficient importance to be tabulated alone, but are of considerable value to producers. The value of these miscellaneous crops in 1906 was estimated at \$165,946.

These crops are raised for market almost exclusively in northern Illinois, which reports the value of same \$157,443, the remainder being nearly equally divided between the other two sections of the State.

Alfalfa is being raised in a few counties successfully.

FRUIT.

Apples.

The apple crop of Illinois for 1906 amounted to 256,897 bushels.

The average price per bushel is 65 cents, making the total value of the crops \$165,128.

The following table gives the number of bushels of apples and the value of the crops since 1876:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	5,395,351	\$0 80	\$4,316,281

CROP REPORT.

Peaches.

But, 9,327 bushels of peaches were reported produced in 1906, of which 8,521 bushels were raised in southern Illinois.

The average price per bushel was 90 cents, giving a total value of \$8,300.

The following table gives the quantity and value of the peaches produced in the State during the past thirty years:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	402,587	\$0 92	\$370,280
1878.....	607,292	62	376,521

Pears.

There were but 2,282 bushels of pears produced in 1906.

Northern Illinois reports 742 bushels, central Illinois 217 bushels and southern Illinois 1,323 bushels.

At the price of \$1.00 per bushel, the total value of the crop was \$2,276.

The following table gives the extent and value of the pear crop of the State since and including 1877:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	16,318	\$1 35	\$22,704
1878.....	13,510	1 25	16,887

CROP REPORT.

Grapes.

There were 888,341 pounds of grapes produced in 1906. Of this quantity 83,646 pounds were grown in northern Illinois, 317,074 pounds in central Illinois and 487,621 pounds in the southern division of the State.

The average price of 2 cents per pound gives a total valuation of \$21,219.

The following table gives particulars concerning the grape crop of the State for the past thirty years:

YEAR.	Pounds produced.	Price per pound.	Value of crop.
1877.....	3,002,748	\$0 03	\$92,782
1878.....	1,322,636	03	57,079

Wine.

The area in vineyards this year, 918 acres, is 3 per cent. less than in 1905.

There were 86,304 gallons of wine produced, being an average of 94 gallons per acre.

Most of the wine produced in Illinois comes from the central division of the State, which produced 66,055 gallons.

The average price per gallon was 95 cents, the total value of the product at this price being \$82,608.

The following table gives the number of gallons of wine and the value thereof during the past thirty years:

YEAR.	Acreage.	Av. yield per acre— gallons.	Number of gallons produced.	Price per gallon.	Value of crop.
1877.....	2,612	61	158,944	\$1 20	\$191,933

Strawberries.

The value of the strawberry crop for 1906 was reported as being \$32,865, of which \$16,171 was reported from northern Illinois, \$1,501 from central Illinois and \$15,193 from the southern division of the State.

Watermelons.

The value of melons sold in northern Illinois was \$33,620, in central Illinois \$5,651 and in the southern division of the State \$2,523, a total value of \$41,794.

Bees and Honey.

There were 316,701 pounds of honey produced in 1906.

The average price obtained for that sold was 14 cents per pound, making the total value \$45,959.

The total number of hives of bees reported for 1906 was 56,455.

The following table gives the amount and value of honey produced in this State during the past sixteen years, together with the number of hives of bees:

YEAR.	Pounds produced.	Price per pound.	Value of product.	Number of hives of bees.
1891.....	821,678	\$0 14	\$112,934	120,252
1892.....	575,356	14	83,294	81,928

LIVE STOCK.

Hogs.

According to the assessor's returns, there were 2,289,078 hogs in the State May 1, 1906. At the equalized value of \$1.25 per head, they were worth \$2,861,347.

The number marketed was 1,899,928 or 83 per cent. of the entire number.

The average weight of those marketed was 220 pounds, giving a total gross weight of 415,511,810 pounds.

The average price of hogs was higher than for several years past, those marketed averaging \$5.65 per cwt., their value at this rate being \$23,510,348.

The supply of hogs on hand December 1, 1906 was 84 per cent., and the average price per cwt. on that date \$5.65.

Hog cholera is reported from DeKalb, Henry, Kendall, Knox, LaSalle, Warren, Winnebago, Calhoun, Cass, Christian, Douglas, Edgar, Ford, Hancock, McLean, Moultrie, Pike, Sangamon, Vermilion and Clay counties.

The following table gives the number of hogs assessed and marketed in 1906 as well as their weight and value, for the last fifty-one years:

YEAR.	Assessors' Returns.			Number fat hogs marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value hogs marketed.
	Number.	Value.	Estimated per cent. marketed.

Beef Cattle.

The number of cattle in the State May 1, 1906, according to assessor's returns, was 2,203,108. At the equalized value of \$4.42 per head, they are worth \$9,737,737.

About 23 per cent. of the whole, or 506,713 were marketed during the year.

Their average weight was 1100 pounds, making their total weight 557,209,215 pounds.

The average price of those sold prior to December 1, was \$4.40 per cwt., giving a total value of \$24,430,940.

The supply of beef cattle on hand December 1 is 87 per cent. and the average price per cwt. on that date \$4.25.

Blackleg among young cattle is reported from Warren county. Milk fever is reported from Winnebago county and cornstalk disease from Ford and Woodford counties.

The following table gives the number, weight and value of the cattle marketed in the State since 1855:

YEAR.	Assessors' Returns.		Estimated per cent marketed.	Number beef cattle marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value beef cattle marketed.
	Number.	Value.

Sheep.

Fewer sheep were reported by assessors this year than ever before, only 417,945.

Their equalized value per head is 77 cents, making their total equalized value \$321,818.

Of the number assessed 22 per cent., or 91,942 were marketed, their average gross weight being 102 pounds, and the total gross weight 9,359,302 pounds.

The average price received for those marketed prior to December 1, was \$4.95 per cwt., making their total value \$463,609.

The supply of sheep on hand December 1, 1906 as compared with the same date last year, was 90 per cent., and the average price per cwt., \$5.00.

CROP REPORT.

29

The following table gives the number, weight and value of the sheep marketed in the State since 1855:

YEAR.	Assessors' Returns.		Estimated per cent marketed.	Number fat sheep marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value sheep marketed.

CROP REPORT.

Wool.

There were 1,791,330 pounds of wool shorn in 1906.

The average price per pound was 26 cents and the total value of the wool clip amounted to \$469,259.

The following table gives the number of pounds shorn, the price per pound, and the total value of the wool clip for the last thirty years:

YEAR.	Number pounds shorn.	Price per pound.	Total value.
1877.....	3,291,677	\$0 30	\$987,503

HORSES.

The number of horses reported by assessors this year is 1,051,757, and their equalized value per head, \$13.56, the total value being \$14,261,825.

The number of colts foaled in 1905 was 80,808.

Distemper is reported from Grundy, Champaign, Shelby and Edwards counties.

Colic among horses and some poison from frosted clover is reported from Pulaski county.

Several horses have died from spinal meningitis in Williamson county.

The following table gives the number of horses assessed in the State since 1855, and their equalized valuation, as well as the number of colts foaled each year since 1878:

YEAR.	Assessors' Returns.		Number colts foaled.
	Number.	Value.

Cheese.

There were 862,184 pounds of cheese sold in 1906.

The average price per pound was 15 cents and the total value \$130,625.

The following table shows the quantity and value of the cheese sold in the State since 1876:

YEAR.	Pounds sold.	Price per pound.	Total value.
1877.....	4,502,671	\$0 12	\$540,320
1878.....	5,139,914	10	513,691

Tables published elsewhere in this report give by counties the quantity and value of the dairy products of the State for 1906.

Poultry and Eggs.

The value of the poultry sold in the State in 1906 was two per cent. greater than that of the previous year, being \$1,571,426.

In northern Illinois the value of poultry sold was \$936,985, in central Illinois \$415,580, and in the southern division of the State \$218,861.

Chicken cholera was reported from Christian county.

The value of eggs sold in the State in 1906 was 3 per cent. greater than in 1905.

Northern Illinois reports \$848,243, central Illinois \$330,093, and southern Illinois \$374,350, a total value of \$1,552,686.

SUMMARY.

The following table gives in small space the value of the principal farm products and live stock of Illinois for the year 1906:

Corn	\$103,489,520
Winter wheat.....	19,026,667
Spring wheat.....	755,807
Oats	27,462,112
Rye	718,376
Barley	337,547
Buckwheat	17,166
Hay	22,712,456
Timothy seed	113,810
Clover seed	270,932
Hungarian and millet seed	26,936
Irish potatoes	5,555,817
Sweet potatoes	191,725
Turnips and other root crops	73,415
Broom-corn	508,329
Sorghum	171,837
Beans	32,934
Castor Beans	98,223
Tobacco	232,504
Other crops not named	157,443
Apples	165,128
Peaches	8,300
Pears	2,276
Grapes	21,219
Strawberries	32,865
Watermelons	41,794
Other fruits and berries	83,979
Wine	82,608
Honey	45,959
*Horses (equalized value)	14,261,825
*Beef cattle (equalized value)	9,737,737
Dairy cows	22,355,899
*Hogs (equalized value)	2,861,347
*Sheep (equalized value)	321,818
Wool	469,259
Milk sold	13,684,431
Cream sold	979,787
Butter sold	3,044,880
Cheese sold	130,625
Poultry sold	1,571,426
Eggs sold	1,552,686
Total	\$253,409,404

*Note—The equalized value as fixed by the State Board of Equalization, represents but one-fifth of the actual value.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent, is recorded 110; a decrease of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for the term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,

Secretary.

* If the crop had been sold at prevailing prices December 1, it would have returned this amount to the producer.

NAMES AND POSTOFFICE ADDRESSES

—OF—

CROP CORRESPONDENTS

STATE BOARD OF AGRICULTURE,

FOR THE YEAR 1906.

WITH DATE OF APPOINTMENT.

ADAMS COUNTY—

- 1879, G. W. Dean, R. F. D. No. 1,
Adams.
- 1883, H. C. Cupp, Fall Creek.
- 1888, C. H. Rankin, Fall Creek.
- 1904, A. R. Wallace, Jr., Camp Point.

ALEXANDER COUNTY—

BOND COUNTY—

- 1885, J. E. Denny, Sorento.
- 1885, W. H. Taylor, Greenville.
- 1898, L. E. Alexander, Reno.
- 1904, A. O. Donnel, Greenville, R. R.
No. 1.

BOONE COUNTY—

- 1899, O. S. Cohoon, Belvidere.

BROWN COUNTY—

- 1889, W. B. Rigg, Mt. Sterling.
- 1889, C. J. Davis, Limewell.

BUREAU COUNTY—

- 1897, O. W. Mason, Buda.
- 1904, W. Scott Martin, La Moille.

CALHOUN COUNTY—

- 1881, M. A. Kamp, Kampsville.
- 1906, J. H. Walston, Kampsville.

CARROLL COUNTY—

- 1899, Henry Daehler, Chadwick.
- 1899, Jacob Grossman, Lanark.
- 1900, J. M. Carroll, Argo.

CASS COUNTY—

- 1878, John Beggs, Ashland.
- 1896, W. W. Matthew, Ashland, R.
No. 2.
- 1903, M. L. Crum, Virginia.
- 1904, G. J. Armstrong, Chandlerville.

CHAMPAIGN COUNTY—

- 1877, W. A. Conkey, Homer.
- 1885, W. E. Dawley, Seymour.

CHRISTIAN COUNTY—

- 1877, John W. Hunter, Pana.
- 1877, A. B. Herdman, Morrisonville.
- 1878, O. S. Nash, Sharpsburg.
- 1897, Basil Hill, Edinburg.
- 1904, J. Earl White, Morrisonville.

CLARK COUNTY—

- 1877, F. B. Ennis, R. F. D. No. 4,
Martinsville.
- 1877, R. R. Scott, Casey.
- 1880, Jerry Ishler, Martinsville.
- 1900, Wilfred Shaw, Darwin.

CLAY COUNTY—

- 1891, Edgar Hayes, Iola.
- 1902, Israel Mills, Clay City.
- 1904, Leslie F. Brissenden, Flora.
- 1904, T. O. Pierce, Xenia.
- 1904, Jno. T. Campbell, Louisville.

CLINTON COUNTY—

- 1890, John E. Heimann, Damiansville.
- 1901, Frank Bassler, Trenton.

COLES COUNTY—

- 1905, John W. Black, Humboldt.
- 1905, James A. Walker, Lerna.
- 1905, E. E. Boyer, Ashmore.

COOK COUNTY—

- 1830, E. Wheeler, Arlington Heights.

CRAWFORD COUNTY—

- 1877, William L. Heustis, Robinson.
- 1882, William Wood, Oblong.
- 1897, W. M. Hart, Annapolis.
- 1900, Clinton Newlin, Hutsonville.
- 1900, D. H. Newlin, Hutsonville.
- 1905, Clinton Vaughan, Hutsonville.

CUMBERLAND COUNTY—

- 1882, Jas. M. Albin, Neoga.
- 1887, David B. Green, Toledo.
- 1897, J. L. Mattoon, Greenup.

DE KALB COUNTY—

- 1905, Wm. A. Dennis, Sandwich.
- 1905, A. J. Plapp, Malta.
- 1906, John L. Storey, Shabbona, R. F. D. No. 2.

DE WITT COUNTY—

- 1882, W. R. Carle, Wapella.
- 1897, W. H. Oglevee, Clinton.
- 1898, C. E. Robb, Clinton.

DOUGLAS COUNTY—

- 1887, William Iles, R. F. D. No. 6, Tuscola.
- 1892, Perry N. Howe, R. F. D. No. 3, Tuscola.
- 1897, J. S. Campbell, Tuscola.

DU PAGE COUNTY—

- 1885, Thomas Betts, Jr., Naperville.

- 1889, Wm. Browning, Zeigler.
- 1889, John A. Coleman, West Frankfort.
- 1896, M. N. Webb, Benton, R. R. No. 2.
- 1904, W. B. Martin, Benton.
- 1904, C. M. Upchurch, Ewing.
- 1905, J. F. Ice, West Frankfort.

FULTON COUNTY—

- 1878, John Prickett, Lewistown.
- 1902, C. W. Craft, Vermont.
- 1903, C. E. Chick, Vermont.
- 1904, Abram Wilson, Fairview.

GALLATIN COUNTY—

- 1889, John M. Bowling, Equality.
- 1906, Ed. Rice, Ridgeway.

GREENE COUNTY—

- 1902, L. E. Prindle, Roodhouse

GRUNDY COUNTY—

- 1891, F. Dirst, Minooka.
- 1892, Louis Germain, Gardner.
- 1892, Wm. Reardon, Morris.

HAMILTON COUNTY—

- 1887, Geo. K. Edwards, McLeansboro.
- 1889, J. D. Lockwood, Braden.
- 1889, J. M. Weldin, McLeansboro.

HANCOCK COUNTY—

- 1877, E. J. Baxter, Nauvoo.
- 1885, C. M. McMillan, Carthage, R. R. No. 2.
- 1885, W. A. Moore, R. F. D. No. 2, Carthage.
- 1906, Geo. Campbell, La Harpe, R. F. D. No. 2.

HARDIN COUNTY—

- 1892, John Gross, Grossville.

HENDERSON COUNTY—

- 1893, D. A. Whiteman, Biggsville.

HENRY COUNTY—

- 1877, N. C. Gilbert, Geneseo.
- 1877, John A. Widney, Alpha.
- 1889, Horace S. Gilbert, Geneseo.

IROQUOIS COUNTY—

- 1879, Robert Caldwell, Sheldon.
- 1897, Herman Salmon, Milford, R. R. No. 2.
- 1897, Peter Wright, Clifton.

JACKSON COUNTY—

- 1904, H. G. Easterly, Carbondale.
- 1904, Peter W. Griffith, Murphysboro.

JASPER COUNTY—

- 1876, W. E. Barrett, Lis.
- 1876, A. Wilson, Wheeler.
- 1902, W. A. Kibler, R. F. D. No. 2, Rose Hill.
- 1906, G. A. Clark, Hunt City.

JEFFERSON COUNTY—

- 1879, E. S. Noleman, R. F. D. No. 2, Centralia.
- 1897, A. J. Cook, Opdyke.

JERSEY COUNTY—

- 1891, M. C. Stanley, Jerseyville.
- 1891, Wm. Lawler, Nutwood.
- 1891, Jas. M. Segraves, Beltsres.
- 1887, Jas. Chambers, Godfrey.

JO DAVIESS COUNTY—

- 1885, Geo. W. Pepon, Warren.
- 1904, W. G. Curtiss, Stockton.

JOHNSON COUNTY—

- 1880, J. F. Casper, Buncombe.
- 1886, S. P. Thacher, Ozark.
- 1886, S. P. Thacher, Ozark, R. R. No. 1.
- 1894, Thos. B. Gore, Buncombe, R. F. D. No. 2.

KANE COUNTY—

- 1882, Daniel Whitney, Wasco.
- 1884, George E. Peck, Geneva.
- 1894, L. E. Bartlett, Elburn.
- 1877, Geo. M. Hollenback, Aurora.

KANKAKEE COUNTY—

1885, Eugene Mathers, Momence.

KENDALL COUNTY—

1896, C. C. Hoge, Newark.
 1900, D. F. Palmer, Yorkville.
 1900, Herman A. Grimwood, Bristol,
 R. R.

KNOX COUNTY—

1885, J. F. Latimer, Abingdon.
 1894, Joseph W. Miles, Gilson.

LAKE COUNTY—

1878, Henry Hart, Round Lake.
 1889, J. A. Mason, Prairie View.

LA SALLE COUNTY—

1877, Thomas J. Davis, Mendota.
 1883, L. A. Burgess, Tonica.
 1883, C. A. Whitney, Lостant.
 1834, W. B. Rockwood, Sheridan.
 1898, J. L. Armstrong, Seneca.

LAWRENCE COUNTY—

1887, D. S. Porter, Lawrenceville.
 1882, J. A. Fyffe, Sumner.
 1903, W. E. Neal, Lawrenceville, R.
 F. D. No. 4.
 1903, Wm. McAndrew, Vincennes,
 Ind.

LEE COUNTY—

1892, Austin A. Powers, Sterling.
 1895, Ira R. George, Ashton.
 1904, Jno. C. McCleary, R. F. D. No.
 1, Dixon.
 1904, W. L. Sheap, Franklin Grove.
 1905, E. J. Hollenbeck, Rock Falls,
 R. F. D. No. 3.

LIVINGSTON COUNTY—

1889, Austin Gibbons, Dwight.
 1892, Marion Gallup, Pontiac.
 1896, H. J. Mies, Saunemin.

LOGAN COUNTY—

1883, John Harman, Beason.
 1887, T. S. King, Lincoln.

MACON COUNTY—

1877, T. H. Barr, Maroa.
 1877, G. Elliott, Decatur.
 1885, S. P. Nickey, Oakley, R. F. D.
 No. 1.
 1899, Cassius Holcomb, Oakley.

MACOUPIN COUNTY—

1877, John P. Henderson, Virden.
 1877, I. B. Vancil, Modesto.
 1885, George W. Ribble, Hettick.
 1900, Geo. W. Denby, Carlinville.

MADISON COUNTY—

1877, Irby Williams, Bethalto.
 1885, J. M. Pearson, Godfrey.
 1904, W. P. Sweeny, St. Jacob.

MARION COUNTY—

1892, W. S. Ross, Alma.
 1892, W. J. Stiles, Sandoval.

ILLINOIS CROP REPORT

FOR

MAY 1, 1907.

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE
SPRINGFIELD, MAY 1, 1907.

The information contained in this report was obtained from the reports of correspondents mailed to this Department the first day of May.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number three hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WINTER WHEAT.

The May 1 reports to this Department show the area winter-killed or destroyed by floods the past season was 7 per cent. of that seeded last fall, leaving 1,278,516 acres for harvest.

In the northern and southern divisions of the State respectively, the area destroyed was 9 per cent. and in the central division but 4 per cent. The May 1 condition is but 89 per cent. of a seasonable average, due to the cool weather of April, which retarded its growth.

In northern Illinois the May 1 condition is reported as 91 per cent. of a seasonable average, 92 per cent. in central Illinois and but 85 per cent. in the southern division of the State. Hessian fly is reported from Douglas and Franklin counties. St. Clair county reports aphids as numerous.

SPRING WHEAT.

There is a slight increase in the area sown to spring wheat this year. In northern Illinois the area seeded as compared with 1906 is 101 per cent., and the May 1 condition 91 per cent. of a seasonable average.

No spring wheat is reported from central Illinois, and from but one county, Monroe, in the southern division of the State, which reports the area as 105 per cent. and the May 1 condition as 90 per cent. of a seasonable average.

OLD WHEAT.

Of the 28,458,122 bushels of wheat raised in this State in 1906, 11 per cent. or 3,078,034 bushels are reported as in the producers' hands May 1.

The following table gives the amount of old wheat in first hands the first of May, since and including 1880:

YEAR PRODUCED.	Crop in bushels.	Per cent. crop on hand following May 1.	Amount crop in producers' hands following May 1	Surplus wheat above seed and consumption at harvest.	Deficit at harvest
1880.....	56,508,309	15	8,476,246	39,851,883
1881.....	22,374,163	13	2,924,039	5,765,414
1882.....	52,323,261	15	8,174,634	36,214,133
1883.....	20,374,572	15	3,208,358	4,575,152
1884.....	34,367,493	18	6,350,202	17,367,794
1885.....	8,299,243	14	2,201,904	5,439,786
1886.....	28,284,068	15	4,000,931	12,082,999
1887.....	38,076,468	13	5,034,875	21,842,119
1888.....	33,916,920	12	4,022,569	17,334,947
1889.....	37,201,916	15	5,722,594	20,919,433
1890.....	13,608,504	12	1,580,903	2,002,400
1891.....	34,620,828	17	5,563,995	16,853,536

1895.....	18,093,503	10	1,813,244	169,992
1896.....	21,514,581	9	2,012,437	3,683,784
1897.....	10,255,525	8	848,892	7,600,394
1898.....	18,383,943	9	1,635,451	563,474
1899.....	11,054,736	8	899,397	7,302,728
1900.....	22,006,632	9	1,943,083	3,800,840
1901.....	31,117,798	9	2,893,379	9,197,123
1902.....	36,588,783	9	3,372,341	14,792,384
1903.....	16,118,300	8	1,263,791	5,539,833
1904.....	20,177,390	11	2,981,241	1,183,531
1905.....	22,459,320	10	2,267,322	1,184,844
1906.....	28,458,122	11	3,078,034	7,197,382
Average	26,925,716	13	3,550,672	12,888,750	4,844,778

WINTER RYE.

About 6 per cent. of the area seeded to rye last fall—73,079 acres—was winter-killed, leaving 68,791 acres for harvest.

The May 1 condition of this crop is 93 per cent. of a seasonable average. Northern and central Illinois report the May 1 condition as 95 per cent. and southern Illinois 90 per cent.

OATS.

There is a decrease of 1 per cent. in the area seeded to oats this year, as compared with 1906.

In northern Illinois the area this year as compared with 1906 is 100 per cent., in central Illinois 102 per cent. and in the southern division of the State 95 per cent.

The May 1 condition is but 83 per cent. of a seasonable average. Northern Illinois reports the May 1 condition 79 per cent., central Illinois 87 per cent. and southern Illinois 83 per cent.

BARLEY.

The area devoted to barley in northern Illinois this year is 99 per cent. as compared with 1906 and the May 1 condition 85 per cent.

No barley is reported from central Illinois and from but one county, Hamilton, in the southern division of the State, which reports the area as 100 per cent. of normal and the May 1 condition 94 per cent. of a seasonable average.

OLD CORN.

A little more than the usual proportion of old corn is in producers' hands May 1; 32 per cent. of the entire crop or 91,150,405 bushels.

In northern Illinois there were 43,592,457 bushels on hand, in central Illinois 38,003,950 bushels and in the southern division of the State 9,553,998 bushels.

Livingston county reports the largest amount of corn in first hands May 1, 3,918,916 bushels.

Champaign county produced the largest corn crop of any county in the State last year, 10,600,200 bushels.

In northern Illinois the percentage of the entire crop unsold on May 1 was 36 per cent., in central Illinois 30 per cent. and in the southern division of the State 27 per cent.

The following table gives the amount of old corn in the producers' hands May 1, the past twenty-eight years, as well as the extent of the crop produced each year:

YEAR PRODUCED.	Crop.	Per ct. corn on hand following May 1.	Bushels corn in producers' hands following May 1.
1879	305,913,277	32	99,229,889
1880	250,697,036	28	71,929,343
1881	174,491,706	21	37,445,964
1882	179,471,729	24	43,450,857
1883	186,583,558	21	39,478,621
1884	207,556,662	24	50,102,264
1885	230,922,298	24	57,047,027
1886	182,755,053	24	43,346,028
1887	129,537,603	18	23,573,279
1888	277,726,451	33	92,584,238
1889	247,980,589	36	90,503,175

1904	281,058,931	26	73,777,043
1905	309,316,053	31	95,836,758
1906	284,077,262	32	91,150,405
Average	232,050,062	30	69,561,508

MEADOWS.

The area devoted to meadows is 96 per cent. as compared with last year.

Their May 1 condition is but 87 per cent. of normal. The cold weather during April greatly retarded their growth, especially in northern Illinois.

DeWitt and McLean counties report meadows in poor condition, owing to the damage done by grubs last fall.

PASTURES.

There is a deficiency of 2 per cent. in the area devoted to pastures this year as compared with 1906, being 98 per cent. of normal.

In northern and central Illinois the area is 98 per cent., respectively, and 97 per cent. in the southern division of the State.

The late spring has been unfavorable for the growth of pastures, the May 1 condition being but 85 per cent of a seasonable average.

LaSalle, Peoria, Champaign, Fulton and McLean counties report pastures as badly damaged by grubs last fall.

SPRING PLOWING.

About the usual amount of spring work was completed May 1, many farmers taking advantage of the warm weather in March to begin plowing, but owing to the cool weather of April, seeding has been delayed.

Northern Illinois reports 65 per cent. of the work completed, central Illinois 67 per cent. and southern Illinois 62 per cent.

Outside of a few counties in southern Illinois reporting the soil too wet, the condition of the soil has been excellent, mellow and free from clods, requiring less labor to prepare it for planting.

LIVE STOCK.

Horses.

The number of horses reported on May 1 is 94 per cent. as compared with 1906.

Distemper is reported from Woodford, Edgar and Pike counties. Will county reports a large percentage of young colts dying and Coles county reports an unusual number of mares losing colts at foaling time.

Marshall county reports a fatal disease resembling heart trouble among horses. Those affected are sick but a few moments, muscles quiver and death ensues.

With the above exceptions, the general condition of horses is good, being 98 per cent. of normal.

Mules.

There is a deficiency of 4 per cent. in the number of mules in the State this year as compared with last and their May 1 condition is 99 per cent. of normal.

Cattle.

The number of cattle reported this year is 93 per cent as compared with 1906.

Their May 1 condition is 95 per cent of normal, being 95 per cent. in northern Illinois, 97 per cent. in central Illinois and 94 per cent. in the southern division of the State. Clay county reports some anthrax among cattle and Williamson county reports some deaths among cows at calving time.

Dairy Cows.

In northern and central Illinois the number of dairy cows reported this year is 98 per cent. as compared with last year, and 96 per cent. in southern Illinois. Their May 1 condition is 96 per cent. of normal, being 96 per cent. in northern Illinois, 97 per cent. in central Illinois and 95 per cent. in southern Illinois.

Hogs.

The number of hogs on hand May 1 as compared with last year is 90 per cent. Their May 1 condition 99 per cent. of normal in northern and central Illinois and 98 per cent. in the southern division of the State, Hog cholera is reported from Jersey county.

SHEEP.

The number of sheep on hand May 1, is 94 per cent. as compared with 1906. Their May 1 condition is 98 per cent. of normal, being 99 per cent. in northern and central Illinois respectively and 96 per cent. in the southern division of the State.

FRUIT.

The fruit prospect on May 1, is most unfavorable. The warm weather of March, followed by the frosts of April, worked much havoc to the fruit crop, but to what extent many of our correspondents were unable to tell on May 1. Late apples and late cherries are reported as being less damaged than other fruit by the unseasonable weather of April.

GENERAL FARM NOTES.

Bees are reported as having suffered greatly the past winter, many swarms dying of starvation.

An increase in the area devoted to brcom-corn is reported from Coles and Cumberland counties. Clark and Tazewell counties report an increase in the area of cow peas, and in Cook county an increase in the area of Irish potatoes is noted.

WAGES PAID FARM HANDS.

Notwithstanding the increased wages paid farm hands each year, the supply is constantly diminishing, and this year is 16 per cent. short of the number required.

The railroads, mines and oil wells of the State give employment to many men who formerly worked on the farm, thereby causing this shortage in the supply.

There is not much difference between the wages paid this year and last, but what difference there is, is an increase.

The average wages paid farm hands during the past twenty-eight years is given in the following table:

DIVISION.	PER DAY		PER MONTH.	
	With Board.	Without Board.	With Board.	Without Board.
Northern	\$1 05	\$1 35	\$20 80	\$28 55
Central	90	1 15	18 55	25 00
Southern	65	95	15 50	21 15
Average	\$0 85	\$1 15	\$18 30	\$24 90

CROP REPORT.

9

The wages paid farm help in the three divisions of the State, during the past twenty-eight years, is given in the following tables:

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase, of one-tenth, or ten per cent., is recorded 110; a decrease of five per cent. is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,
Secretary.

ILLINOIS CROP REPORT

FOR

JUNE 20, 1907.

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE
SPRINGFIELD, JUNE 20, 1907.

The information contained in this report was obtained from the reports of correspondents mailed to this office the twentieth of June.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number five hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

Corn.

There is a decrease of 6 per cent from that of last year in the area devoted to corn this year. Northern Illinois reports 98 per cent of an area compared with 1906, Central Illinois 96 per cent and the Southern division of the State but 87 per cent.

The June 20 condition of the crop is reported as being but 75 per cent of a seasonable average, a decrease of 13 points over the June 20 condition last year.

The condition in Northern Illinois is reported as being 74 per cent of a seasonable average, Central Illinois 80 per cent and in the Southern division of the State 72 per cent.

Cold wet weather early in the season greatly retarded early farm work and the crop was later by two weeks, than usual in being planted.

The quality of seed corn was not quite so good as last year being but 93 per cent of an average. The Northern division reporting the quality as being 89 per cent of an average, Central Illinois 95 per cent and the Southern division of the State 94 per cent.

Cut, grub worms, ants and army worms are reported as working on corn in many counties of the State, but up to the present time, seem to have done but little injury to the same. The earliest appearance of corn above ground this year is April 23, which date was reported from Massac, Union and Williamson Counties, but the most of it appeared between the 10th and 20th of May.

Broom Corn.

The area in broom corn is 96 per cent as compared with 1906. In Northern Illinois the area is 105 per cent, in Central Illinois 91 per cent and in Southern Illinois 91 per cent.

The June 20 condition of the crop is only reported as being 78 per cent of a seasonable average, being but 87 per cent in Northern Illinois, 78 per cent in Central Illinois and only 68 per cent in the Southern division of the State.

Sorghum.

The area in Sorghum as compared with 1906 is reported as being 91 per cent, Northern Illinois reporting 94 per cent, Central division of the State 95 per cent and Southern Illinois 84 per cent.

In Northern and Central Illinois the June 20 condition of Broom Corn is 84 per cent of a seasonable average, while in Southern Illinois it is only 74 per cent.

Winter Wheat.

The June 20 condition of Winter Wheat shows an improvement of 2 points, since our report of May 1 was given.

In Northern Illinois the condition is reported as being 92 per cent, Central Illinois 93 per cent, and the Southern Division of the State 89 per cent.

June 17 was the earliest date harvest commenced, this report coming from the extreme Southern part of the State.

No report of any serious damage by Hessian fly or other pest to the wheat from any section of the State, and the June 20 prospect is the best that has been reported for a number of years.

Spring Wheat.

The June 20 condition of Spring Wheat is 12 points better than the May 1 condition, being 102 per cent of a seasonable average, as against 90 per cent on May 1.

Central and Southern Illinois grows very little spring wheat, 95 per cent of the crop being raised in Northern Illinois.

Oats.

Northern Illinois shows an increase of 12 points in the condition of Oats since the May 1 report, while Central Illinois reports a decrease of 5 points and Southern Illinois a decrease of 15 points since May 1.

The June 20 condition in Northern Illinois being 91 per cent, in Central Illinois 82 per cent and in the Southern division of the State but 68 per cent of a seasonable average.

Oats are reported as being greatly damaged in almost every county in the Southern division of the State by a little green bug and a number of counties in Central Illinois report that the same insect is affecting the crop.

In Clinton and Jackson Counties the damage by this bug has been such as to almost entirely destroy this crop.

Rye.

The June 20 condition of Rye is the same as reported May 1, being 90 per cent of a seasonable average. The condition in each division of the State being about the same as on May 1, viz.: Northern Illinois 93 per cent, Central Illinois 96 per cent and Southern Illinois 91 per cent.

There is no especial damage to Rye reported from any County of the State.

Barley.

The condition of barley has improved 4 points since May 1. The June 20 condition being 98 per cent. Northern Illinois reporting 93 per cent, Central Illinois 102 per cent and Southern Illinois 100 per cent.

The bulk of the barley crop is grown in Northern Illinois.

Meadows.

A decrease of 6 per cent is noted in the area devoted to Meadows as compared with 1906. Northern Illinois reports a decrease of 4 per cent, Central Illinois 6 per cent and the Southern division of the State 3 per cent. The June 20 condition of meadows is 86 per cent of a seasonable average in Northern Illinois 87 per cent, in Central Illinois and 76 per cent in Southern Illinois. Meadows are being damaged in a number of counties by the cut and army worms, the greatest damage being reported from Boone, Gallatin, Hamilton, Jackson, Jefferson and Johnson Counties.

Clover.

There is a decrease of 7 per cent in the area devoted to clover this year as compared with 1906.

In Northern Illinois the area is 87 per cent as compared with 1905 in Central Illinois 94 per cent and in Southern Illinois 89 per cent.

The June 20 condition of Clover is 86 per cent in the Northern division, 91 per cent in the Central division and 80 per cent in Southern Illinois.

Clover in many counties has been damaged some by the army and cut worms.

Hungarian and Millet.

The area devoted to Hungarian and Millet is about the same as last year.

In Northern Illinois it is 100 per cent as compared with 1906, Central Illinois 98 per cent, and in the Southern division of the State 101 per cent.

Pastures.

The area devoted to pastures this year is 2 per cent less than a year ago.

In Northern and Central Illinois the area is 98 per cent as compared with 1906 and in the Southern division of the State 95 per cent.

The June 20 condition of pastures is 93 per cent in Northern and Central Illinois and 95 per cent in Southern Illinois.

Pastures have suffered some damage from army worms in several counties of the State.

Irish Potatoes.

There is a decrease of 3 per cent in area devoted to Irish Potatoes this year as compared with last.

In Northern Illinois the area is 97 per cent as compared with 1906 in Central Illinois 99 per cent and in the Southern division of the State 96 per cent.

The June 20 condition was 93 per cent in the Northern division, 95 per cent in Central Illinois and 90 per cent in Southern Illinois, the State average being 93 per cent.

Potato bugs are reported from a number of counties but no serious damage is thus far noted.

Sweet Potatoes.

Northern Illinois reports an increase of 3 per cent in the area devoted to Sweet Potatoes as compared with 1906, Central Illinois a decrease of 1 per cent and Southern Illinois a decrease of 1 per cent. The June 20 condition is 94 per cent of normal in Northern Illinois 93 per cent in Central Illinois and 84 per cent in Southern Illinois.

Field Beans.

There is a decrease of 11 per cent in the area devoted to field beans as compared with 1906.

In Northern Illinois the area is 94 per cent as compared with 1906, in Central Illinois 92 per cent and in the Southern division 82 per cent. A State average of 89 per cent.

Their June 20 condition is 97 per cent in Northern Illinois 85 per cent in Central Illinois and 77 per cent in the Southern division of the State.

Cow Peas.

The area in Cow Peas as compared with 1906 is 133 per cent in Northern Illinois 96 per cent in Central Illinois and 88 per cent in the Southern division.

More attention is being paid to cow peas each year as a food for stock.

Tobacco.

JoDavies and Ogle are the only counties in Northern Illinois reporting tobacco, in both of which counties the area is reported same as last year and the condition is given as 90 per cent of normal.

No tobacco is reported from Central Illinois.

The Southern division of the State reports a deficiency of 11 per cent in the area of tobacco as compared with 1906 and the June 20 condition as 80 per cent of a seasonable average.

FRUIT.

Cherries.

Northern Illinois reports the yield of cherries as only 21 per cent of normal, Central Illinois but 26 per cent and Southern Illinois but 39 per cent or a State average of 29 per cent.

Strawberries.

In Northern and Southern Illinois the yield of Strawberries was 64 per cent of an average and in Central Illinois 71 per cent.

Raspberries.

The yield of raspberries this year was 78 per cent of normal being 74 per cent in Northern Illinois, 83 per cent in Central Illinois and 78 per cent in Southern Illinois.

Gooseberries.

The yield of gooseberries in Northern Illinois was 64 per cent of normal, in Central Illinois 66 per cent and in the Southern division of the State 75 per cent.

Currants.

There was but 63 per cent of an average yield of currants raised in Illinois this year.

Northern Illinois reports 54 per cent, Central Illinois 65 per cent and Southern Illinois 70 per cent.

Vineyards.

There is a deficiency of 3 per cent in the area devoted to vineyards this year as compared with 1906.

The June 20 condition of vineyards is 85 per cent in Northern Illinois, 84 per cent in Central Illinois and 78 per cent in the Southern Division of the State.

YOUNG LIVE STOCK.

Pigs.

There is a decrease of 10 per cent in the number of pigs farrowed this year as compared with 1906. Northern Illinois reports 84 per cent, Central Illinois 95 per cent, and Southern Illinois 91 per cent.

The June 20 condition of pigs is given as being 94 per cent in Northern Illinois, and 97 per cent in Central and Southern Illinois.

Lambs.

The number of Spring Lambs reported this year is 95 per cent compared with 1906. In Northern Illinois the number is 95 per cent, in Central Illinois 97 per cent and in Southern Illinois 93 per cent.

The June 20 condition of lambs is about normal, being 97 per cent in Northern Illinois and 98 per cent in Central and Southern Illinois.

Calves.

Northern Illinois reports the number of calves as 94 per cent of normal and Central and Southern Illinois 96 per cent of normal.

Their June 20 condition in Northern Illinois is 96 per cent and in Central and Southern Illinois 98 per cent respectively.

Colts.

The proportion of colts foaled this year as compared to 1906 is 97 per cent. Northern Illinois reports 94 per cent while Central and Southern Illinois reports 98 per cent.

Their June 20 condition is 97 per cent of normal, there being very little difference in either of the three sections of the State.

The average value of colts at weaning time shows an increase this year of \$7.00 per head over 1906, being \$50.

Northern Illinois reporting the average value to be \$48, Central Illinois \$49, and Southern Illinois \$54. The number of colts lost prior to weaning is 10 per cent in Northern Illinois, 7 per cent in Central Illinois and 6 per cent in the Southern division of the State.

The average cost of service of stallions was \$13 in Northern Illinois, \$12 in Central Illinois and \$10 in Southern Illinois. The health of all farm animals is reported as excellent.

Wool.

The wool clip of 1907 was 4 per cent less than that of 1906. In the Northern division of the State it was 98 per cent and in Central and Southern Illinois 95 per cent.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase, of one-tenth, or ten per cent., is recorded 110; a decrease of five per cent. is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,
Secretary.

ILLINOIS CROP REPORT

FOR

AUGUST 1, 1907.

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE
SPRINGFIELD, AUGUST 1, 1907.

The information contained in this report was obtained from the reports of correspondents mailed to this office the first of August.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number four hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WHEAT.

The area seeded to wheat for the crop of 1907 was 1,442,160 acres, all but 68,350 acres being winter wheat.

Three per cent of the winter wheat area was winter-killed or destroyed by floods, leaving 1,400,834 acres of wheat (spring and winter) for harvest.

The average yield per acre was 17 bushels and the total yield 24,693,328 bushels.

The ruling price of wheat August 1 was 82 cents per bushel, which is the highest price of this product, with one exception, since 1890.

The entire value of the crop at this price being \$20,225,418.

The quality of the wheat produced this year is above the average, being reported from every section of the state as excellent.

Jersey county reports smut and Kane, Schuyler and Saline counties report rust in wheat.

The continued wet weather is endangering the crop yet unthreshed, as there is danger of same sprouting, a few counties already reporting the wheat sprouting in the shock.

The following table gives the area, yield and value of the wheat crop of the state during the past forty-seven years:

WHEAT (SPRING AND WINTER.)

YEAR	Number of acres harvested.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

Wheat Consumption.

In estimating the amount of wheat required in the State for seed and bread it is necessary to consider the entire area seeded instead of that harvested, as the amount required for seed is based on the area seeded last year, which was 1,442,160 acres. As one and one-third bushels per acre is used for seed it will require 1,922,885 bushels to seed next year's crop.

Allowing four bushels per capita for food, it takes, according to the 1900 census, which gives Illinois 4,821,550 inhabitants, 19,287,000 bushels for that purpose, so that 21,209,885 bushels will be required for home use. As the total yield amounted to 24,693,328 bushels, there remains 3,483,443 bushels for export.

OATS.

The area devoted to oats this year is the smallest seeded for fifteen years, being but 3,008,313 acres.

This was due to the continued wet weather at seeding time, which prevented the full acreage being sown.

Northern Illinois reports 1,793,508 acres, central Illinois 917,079 acres and southern Illinois 297,726 acres.

The average yield per acre for the State is 29 bushels and the total yield 89,147,230 bushels, which is the smallest yield since 1895.

This shortage was due greatly to the green bugs, which worked havoc to the growing crop, being reported from Bureau, Cook, DeKalb, Henderson, Kane, Knox, McHenry, Mercer, Peoria, Putnam, Whiteside, Winnebago, Woodford, Hancock, Logan, Mason, Menard, Morgan, Tazewell, Hardin Perry, Randolph, Saline, Washington, Wayne and Williamson counties.

Rust is reported from DeKalb, Kane, Kendall, McHenry, Mercer, Stephenson, Warren, Winnebago, Logan, Shelby, Clay, Jasper, Perry, Wabash and Wayne counties.

Many counties in the State report the crop damaged greatly by excessive moisture.

The prevailing price of oats August 1 was 36 cents and the value of the crop at this price amounted to \$31,708,106.

CROP REPORT.

The following table gives the area, yield and value of the oats crop of the State during the past forty-seven years:

YEAR.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of the oats crop in each county in the state this year.

RYE.

There is a decrease of 10,000 acres in the area devoted to rye this year, as compared with 1906, the area harvested being 70,467 acres.

The average yield per acre of 19 bushels is a little above the average for the past few years. The total yield being 1,376,241 bushels, the greater part of which was raised in the northern division of the State.

The August 1 price of rye, 65 cents, is the highest reported in 25 years, the crop at that price being worth \$892,473.

CROP REPORT.

7

The following table gives the area, yield and value of the past forty-seven rye crops grown in the State:

Year.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of rye in each county in the State.

Barley.

Of the 30,909 acres devoted to barley 29,389 acres are reported from the northern division of the State.

The average yield per acre of 30 bushels was better than usual, the total yield being 919,129 bushels.

The August 1 price of barley is reported as being 44 cents per bushel, making the total value of the crop at this price \$405,811.

CROP REPORT.

The following table gives the area, yield and value of the last forty-seven barley crops produced in the State:

Year.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

In a table published elsewhere in this report will be found the area, yield and value of the barley crop in the State by counties.

HAY.

Northern Illinois reports the area of meadows as 984,534 acres, central Illinois 804,364 acres, southern Illinois 576,158 acres, a total area of 2,360,056 acres.

The average yield per acre, 1½ tons, is above the average yield for the past ten years. The total yield was 3,287,062 tons and the average price on August 1 was \$10 per ton, making the total value of the crop \$32,871,936.

CROP REPORT.

9

The yield of clover was 1 2-3 tons per acre in northern Illinois, 1¼ tons in central Illinois and 1½ tons in the southern division of the state.

The August 1 condition of clover is reported as 85 per cent of normal in northern Illinois, 89 per cent in central Illinois and 88 per cent in the southern division of the State.

The following table gives the area, yield and value of the last forty-seven hay crops produced in this State:

Year.	Number of acres.	Average yield per acre—tons.	Tons produced.	Price per ton.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

CORN.

There is a decrease of 326,061 acres in the area devoted to corn this year, as compared with 1906.

The late wet spring delayed the farm work to such an extent that farmers were unable to put in as large an acreage as usual.

The August 1 condition of the crop is given as 83 per cent of normal in northern Illinois, 89 per cent in central Illinois and 75 per cent in southern Illinois, a state average of 82 per cent.

This is an increase of 7 points in the condition of corn since our June 20th report, and 1 point better than August 1, 1906.

The report of great damage to the growing crop from excessive rainfall is general from almost every county in the state. For this reason corn is reported very weedy, as farmers have been unable to get into the fields to properly cultivate them.

Corn on bottom lands is practically drowned out.

Very little damage from insects is reported.

BROOM-CORN.

The August 1 condition of broom-corn was 85 per cent of a seasonable average in both northern and central Illinois and 67 per cent in the southern division of the State, a State average of 79 per cent.

SORGHUM.

The August 1 condition of sorghum was 84 per cent of a seasonable average, northern Illinois reporting 89 per cent, central Illinois 87 per cent and the southern division of the State 75 per cent.

PASTURES.

There is an increase of 63,721 acres in the area of pastures this year, as compared with last, the total area being 4,307,538 acres.

The August 1 condition of pastures is 101 per cent of normal in northern Illinois, 100 per cent in central Illinois and 95 per cent in southern Illinois, a State average of 99 per cent, which is the best August 1 condition received for a number of years.

IRISH POTATOES.

There is a decrease of 8 points in the condition of Irish potatoes since the June 20th report was issued.

The August 1 condition is 85 per cent of normal, being 85 per cent in northern Illinois, 86 per cent in central Illinois and 83 per cent in the southern division of the State.

SWEET POTATOES.

The August 1 condition of this crop is 89 per cent of a seasonable average in northern Illinois, 90 per cent in central Illinois and 85 per cent in the southern division of the State.

BUCKWHEAT.

A deficiency of 14 per cent in the area devoted to buckwheat, as compared with 1906, is noted.

In the northern division of the State the August 1 condition of buckwheat is 100 per cent of normal, in central Illinois 89 per cent and 79 per cent in the southern division of the State.

TURNIPS AND OTHER ROOT CROPS.

In northern Illinois the area in turnips and other root crops is 97 per cent of that of 1906, 95 per cent in central Illinois and 93 per cent in the southern division of the State.

The August 1 condition of these crops is 97 per cent of a seasonable average in northern Illinois, 94 per cent in central Illinois, 92 per cent in southern Illinois, a State average of 94 per cent.

TOBACCO.

But one county in northern Illinois—JoDaviess—reports on this crop, its August 1 condition being 95 per cent.

Central Illinois reports no area.

In the southern division of the State the August 1 condition is 87 per cent of normal.

CASTOR BEANS.

The August 1 condition of castor beans is 100 per cent of normal in northern Illinois, 90 per cent in central Illinois and 85 per cent in the southern division of the State.

COW PEAS.

In northern Illinois the August 1 condition of cow peas was 100 per cent of a seasonable average, in central Illinois 95 per cent and 78 per cent in the southern division of the State.

FRUIT.

The Illinois fruit prospect is most discouraging, due to the frosts occurring late in the spring.

APPLES.

The apple crop is almost an entire failure.

Northern Illinois reports the August 1 condition of apples as 32 per cent of normal, central Illinois 33 per cent and southern Illinois 34 per cent, a State average of 33 per cent.

Apples are reported as falling badly.

PEACHES.

But few peaches will be produced in the State this year, and their August 1 condition is but 34 per cent of a seasonable average. Northern Illinois reports 30 per cent, central Illinois 25 per cent and southern Illinois 46 per cent.

PEARS.

The August 1 condition of pears is 30 per cent of normal in northern Illinois, 25 per cent in central Illinois, 30 per cent in the southern division of the State, a State average of 28 per cent.

PLUMS.

Northern Illinois reports the August 1 condition of plums as 21 per cent of normal, central Illinois 27 per cent and the southern division of the State 57 per cent, a State average of 35 per cent.

GRAPES.

The August 1 condition of grapes is 86 per cent of a seasonable average in northern Illinois, 77 per cent in central Illinois and 76 per cent in the southern division of the State.

BLACKBERRIES.

The blackberry crop this year was 92 per cent of an average yield, being 88 per cent in northern Illinois, 93 per cent in central Illinois and 94 per cent in the southern division of the State.

QUINCES.

But a few quinces are reported from northern Illinois, where their August 1 condition is 42 per cent of normal. Central Illinois reports the condition 50 per cent and the southern division of the State 57 per cent, a State average of 50 per cent.

LIVE STOCK.

The condition of live stock is excellent, but few cases of disease being reported. Distemper is reported from Logan county and hog cholera from Putnam and Jersey counties.

Bond county reports some cattle as sore-footed, due to weeds and tall grass in pasture.

DRAIN TILE.

So far as can be ascertained there are now 734,122,181 feet of drain tile in the State, which gives an average of 26 feet to each acre of cultivated land in Illinois.

In northern Illinois the average number of feet per acre is 39, in central Illinois 30, while in the southern division of the State few counties average as much as 1 foot per acre.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase, of one-tenth, or ten per cent., is recorded 110; a decrease of five per cent. is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

W: C. GARRARD,
Secretary.

ILLINOIS CROP REPORT

FOR

DECEMBER 1, 1907.

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE
AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE,
SPRINGFIELD, December 1, 1907.

The information contained in this report as to the acreage of crops and number of head of live stock was obtained from the reports of assessors made to this Department as required by law.

The data in regard to yield per acre, price of crops and value of crops and live stock was obtained from crop correspondents, who number four hundred, and represent every section of the State.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the conditions and yield of crops.

CROP REPORT.

WINTER GRAIN.

WHEAT.

A decrease of 3 per cent is reported in the area seeded to wheat this fall, as compared with 1906, 1,319,393 acres being reported.

Northern Illinois reports 38,359 acres, Central Illinois 612,267 acres and Southern Illinois 668,767 acres.

The December 1 condition of the growing crop is 91 per cent of normal, being 95 per cent in Northern Illinois, 88 per cent in Central Illinois and 91 per cent in the Southern division of the State.

Wheat is reported as rather backward, due to lack of moisture.

Some damage has been done to wheat by green bugs in Menard county. Hessian fly in wheat is reported from Clay, Hamilton, Randolph, Washington and Wayne counties. Army worms have injured wheat in Alexander county.

RYE.

There is a decrease of 5 per cent in the area seeded to rye, as compared with last year, but 67,400 acres being reported.

Northern Illinois reports 55,324 acres, Central Illinois 9,124 acres and Southern Illinois 2,952 acres.

The condition of this crop December 1, is 95 per cent of a seasonable average, being 97 per cent in both the northern and southern divisions of the State and 92 per cent in the central division.

CORN.

The area devoted to corn this year, 7,295,000 acres, is 4 per cent less than in 1906, when 7,622,000 acres were reported and 4 per cent less than the average area planted for ten years previous.

The late wet spring delayed the planting so that farmers were unable to put in as large an acreage as usual.

Northern Illinois reports 2,972,781 acres, Central Illinois 3,309,599 acres and Southern Illinois 1,012,493 acres.

The average yield per acre in Northern Illinois is 33 bushels, in Central Illinois 38 bushels and in Southern Illinois 28 bushels, a State average of 35 bushels, which is the average yield per acre for ten years past.

The total corn crop of the State in 1907 amounted to 254,608,895 bushels, of which 99,275,487 bushels were produced in Northern Illinois, 127,378,901 bushels in Central Illinois and 27,954,507 bushels in the Southern division of the State.

The ruling price of corn December 1, was 44 cents per bushel, making the total value of the crop \$111,344,922.

The quality of the grain is but 83 per cent of normal, being 74 per cent in Northern Illinois, 92 per cent in Central Illinois and 82 per cent in the Southern division of the State.

Corn is reported as soft and not fully matured from many counties in the State, especially those in the northern division.

Peoria, Christian, Logan and Scott report corn as injured by root lice.

Wire and cut worms are reported from Peoria, Champaign, Logan, Monroe, Union and White counties.

Chinch bugs damaged corn in Massac county.

The area, yield and value of the corn crop of the State for the past forty-eight years is given in the following table:

YEAR	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel—cents.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.
1860.	3,839,159	30	115,174,770	42½	\$48,944,277	\$12 74	\$10 50	\$40,311,169	\$8,633,108

BROOM-CORN.

There is a decrease of 2 per cent in the area of broom-corn as compared with 1906, 8,292 acres being reported.

The average yield per acre was 667 pounds, the total yield being 5,170,000 pounds.

The ruling price December 1 was \$91 per ton, the total value of the crop being \$236,352.

The following table gives the area, yield and value of the broom-corn crop of Illinois since 1876 :

YEAR.	Acreage.	Av. yield per acre— lbs.	Total yield— lbs.	Price per ton.	Value of crop.
1877.....	14,566	458	6,674,747	\$71 20	\$237,594

SORGHUM.

A decrease of 633 acres is noted in the area devoted to sorghum this year, but 3,648 acres being reported. The average yield per acre was 96 gallons, the total yield being 350,153 gallons.

The ruling price December 1 was 50 cents per gallon, the total value of the crop being \$179,846.

The following table gives the area, yield and value of the sorghum crops produced in the State since 1876:

YEAR.	Acreeage.	Av. yield per acre— gallons.	Total number of gallons.	Price per gallon.	Value of crop.

BUCKWHEAT.

There is a slight increase this year in the area devoted to buckwheat as compared with 1906, 2,083 acres being reported.

The average yield per acre was 13 bushels and the total yield 27,683 bushels.

The ruling price December 1 was 70 cents per bushel, making the total value of the crop \$19,499.

The following table gives the area, yield and value of the buckwheat crop in this State for the past thirty-one years:

YEAR.	Acreage.	Av. yield per acre— bushels.	Total number of bushels.	Price per bushel.	Value of crop.
1877.....	15,880	13	207,693	\$0 73	\$151,612

CROP REPORT.

9

TIMOTHY SEED.

There were 49,030 bushels of timothy seed produced in 1907. The average price per bushel was \$2, the value of the crop at this price being \$99,295.

The following table gives the amount and value of the crop in this State since and including 1877:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	483,571	\$1 25	\$604,464

CROP REPORT.

II

HUNGARIAN AND MILLET SEED.

There were 32,372 bushels of Hungarian and millet seed produced in 1907.

The ruling price December 1 was 95-cents per bushel, making the total value of the crop \$30,210.

The following table gives the yield and value of this crop since 1876 :

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	17,463	\$0 65	\$10,701
1878.....	26,787	55	14,733

CROP REPORT.

BEANS.

Only 903 acres are reported as devoted to beans in 1907.

The average yield per acre was 16 bushels and the total yield 14,313 bushels.

The ruling price December 1 was \$2.10 per bushel, the total value of the crop at this price being \$30,336.

The following table gives the area, yield and value of the 1907 crop of beans, together with those of thirty years preceding:

YEAR.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	1,545	13	19,955	\$1 50	\$29,916

CASTOR BEANS.

The area devoted to castor beans is reported as 7,150 acres and the average yield per acre as 13 bushels, the total yield being 94,848 bushels.

The total value of the crop at the ruling price December 1, was \$121,291, an average price of \$1.30 per bushel.

In the following table is given the area, yield and value of this crop since 1877.

YEAR.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	4,503	3¼	17,538	\$1 10	\$ 18,512

CROP REPORT.

TOBACCO.

But 2,558 acres are reported as devoted to tobacco in 1907, of which 2,381 acres are in the southern division of the State.

The average yield per acre was 789 pounds, the total yielding 2,017,450 pounds.

The total value of the crop at the ruling price December 1 was \$221,437, an average price per pound of 11 cents.

The following table gives the area, yield and value of the crop in this State since 1876:

YEAR.	Acreage.	Av. yield per acre— pounds.	Total number of pounds.	Price per pound.	Value of crop.
1877.....	12,320	640	7,885,586	\$0 08	\$638,848

PASTURES.

A little less than a 2 per cent increase is noted in the area of pastures this year, 4,308,402 acres being reported.

The average value per acre was \$4.45 and the total value of pastures was \$19,162,841.

In northern and central Illinois where most of the pasture lands are located, the value is \$4.65 and \$4.40 per acre, respectively, and in the southern division of the State, \$3.65.

The following table gives the area and value of pastures for thirty-one years past:

YEAR.	Acreage.	Value per acre.	Value of crop.
1877.....	4,367,603	\$3 38	\$14,764,112

IRISH POTATOES.

There was a decrease in the area devoted to Irish potatoes this year, 93,887 acres being reported as compared with 96,554 acres in 1906.

The average yield per acre is but 72 bushels.

The average price per bushel December 1 was 70 cents and the total value of the crop, 6,783,563 bushels was \$4,842,690.

White grubs caused much damage to Irish potatoes in Pulaski county.

The following table gives the area, yield and value of the Irish potato crops of the State since 1859:

YEAR.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

CROP REPORT.

17

SWEET POTATOES.

The area devoted to sweet potatoes in 1907 was 2,702 acres.

The total yield was 188,247 bushels, an average of 70 bushels per acre.

The ruling price December 1 was 90 cents per bushel, the total value of the crop being \$166,827.

The following table gives the area, yield and value of the sweet potato crop of the State for the past thirty-one years.

YEAR.	Acreage.	A.v. yield per acre- bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	2,355	63	148,270	\$0 85	\$126,092
1878.....	1,729	67	116,944	85	99,402

1907.....	2,702	70	188,247	90	166,827

TURNIPS AND OTHER ROOT CROPS.

A decrease of five per cent is reported in the area devoted to turnips and other root crops this year, as compared with 1906, but 409 acres being reported.

The average value per acre is \$157.58 and the total value \$64,449.

The average yield of turnips per acre was 136 bushels.

The following tables gives the acreage and value of turnips and other root crops grown in the State during the past thirty-one years :

YEAR.	Acreage.	Value per acre.	Value of crop.
1877.....	7,056	\$39 55	\$279,136
1878.....	3,775	40 85	154,140

1907.....	409	157 58	64,449

OTHER CROPS NOT NAMED.

There are a number of crops raised in this State which are cultivated only in limited localities, and are not of sufficient importance to be tabulated alone, but are of considerable value to producers. The value of these miscellaneous crops in 1907 was estimated at \$152,401.

These crops are raised for market almost exclusively in northern Illinois, which reports the value of the same as \$145,242, the remainder being nearly equally divided between the other two sections of the State.

FRUIT.

On account of the meagre statistics furnished this department on the fruit crop, viz.: apples, peaches and pears, a correct estimate cannot be given.

The fruit crop this year was a total failure throughout the State, which our statistics given below show.

APPLES.

According to the reports received regarding bushels produced in 1907 compared to 1906, but 63,550 bushels are reported.

The average price per bushel is reported as \$1.50, making the total value \$94,826.

The following table gives the number of bushels of apples and the value of the crops since 1876:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	5,395,351	\$0 80	\$4,316,281
1878.....	4,940,811	65	3,211,527

CROP REPORT.

PEACHES.

But 4,586 bushels of peaches were reported produced in Illinois in 1907.

The average price per bushel was \$1.30, giving a total value of \$5,968.

The following table gives the quantity and value of the peaches produced in the State during the past thirty-one years :

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	402,587	\$0 92	\$370,280

CROP REPORT.

GRAPES.

There were 538,944 pounds of grapes produced in 1907. Of this amount 63,864 pounds were grown in northern Illinois, 213,416 pounds in central Illinois and 261,664 pounds in the southern division of the State.

The average price of 2 cents per pound gives a total value of \$13,418.

The following table gives particulars concerning the grape-crop of the State for the past thirty-one years:

YEAR.	Pounds produced.	Price per pound.	Value of crop.
1877.....	3,002,748	\$0 03	\$92,782
1878.....	1,322,636	03	57,679

WINE.

The area in vineyards this year—890 acres—is 3 per cent less than in 1906. There were 31,402 gallons of wine produced in 1907, being an average of 35 gallons per acre.

Most of the wine is produced in central Illinois, which reports 20,255 gallons.

The average price per gallon was 80 cents, the total value of the product at this price being \$25,196.

The following table gives the number of gallons of wine and the value thereof during the past thirty-one years:

YEAR.	Acreage.	Av. yield per acre— gallons.	Number of gallons produced.	Price per gallon.	Value of crop.

STRAWBERRIES.

The value of the strawberry crop for 1907 was reported as being \$30,386, of which \$13,278 was reported from northern Illinois, \$1,389 from central Illinois and \$15,719 from the southern division of the State.

WATERMELONS.

The value of melons sold in northern Illinois was \$34,105, in central Illinois \$4,438 and in the southern division of the State \$2,701, a total value of \$41,244.

BEES AND HONEY.

There were 254,334 pounds of honey produced in 1907.

The average price obtained for that sold was 16 cents per pound, making the total value \$40,340.

The total number of hives of bees reported for 1907 was 53,031.

The following table gives the amount and value of honey produced in this State during the past seventeen years, together with the number of hives of bees:

YEAR.	Pounds produced.	Price per pound.	Value of product.	Number of hives of bees.
1891.....	821,678	\$0 14	\$112,934	120,252

LIVE STOCK.

HOGS.

According to the assessors' returns, there were 2,112,489 hogs in the State May 1, 1907. At the equalized value of \$1.31 per head, they were worth \$2,767,361.

The number marketed was 1,753,365, or 83 per cent of the whole number. The average weight of those marketed was 222 pounds, giving a total gross weight of 389,208,795 pounds. The average price per hundred weight of hogs marketed was \$5.45, their value at this rate being \$21,231,467.

The supply of hogs on hand December 1 was 89 per cent, and the average price per hundred weight on that date \$4.10.

Hog cholera is reported from Bureau, Henry, JoDaviess, Knox, Lee, Marshall, Mercer, Ogle, Peoria, Stephenson, Warren, Adams, Christian, Clark, Coles, Douglas, Fulton, Hancock, Jersey, Logan, Macon, McDonough, McLean, Menard, Pike, Sangamon, Schuyler, Scott, Crawford, Effingham, Randolph and Pulaski counties.

The following table gives the number of hogs assessed and marketed in 1907, as well as their weight and value, for the last fifty-two years:

YEAR.	Assessors' Returns.		Estimated per cent marketed.	Number fat hogs marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value hogs marketed.

BEEF CATTLE.

The number of cattle in the State May 1, 1907, according to assessors' returns, was 2,065,816. At the equalized value of \$4.49 per head, they are worth \$9,275,514. About 23 per cent of the whole, or 475,136, were marketed during the year.

Their average weight was 1,100 pounds, making their total weight 520,606,165 pounds.

The average price of those sold prior to December 1 was \$4.65 per hundred weight, a total value of \$24,105,296.

The supply of beef cattle on hand December 1, 1907, was 87 per cent, and the average price per hundred weight on that date was \$4.

Blackleg among cattle is reported from Bureau, Knox, Ogle, Adams and Cass counties. Some cattle are affected by black tongue in Calhoun county and some lump jaw is reported from Wayne county.

The following table gives the number, weight and value of the cattle marketed in the State since 1855:

YEAR	Assessors' Returns.		Estimated per cent marketed.	Number beef cattle marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value beef cattle marketed.

DAIRY COWS.

There were 690,705 dairy cows reported in Illinois in 1907.

The average value per head was \$40 and the total value \$27,876,530.

The following table gives the number and value of the dairy cows kept in Illinois since 1878:

YEAR.	Number.	Av. value per head.	Total value.
1879.....	571,628	\$31 00	\$17,720,468
1880.....	613,738	31 00	19,035,878

SHEEP.

But 397,601 sheep were reported by assessors this year.

Their equalized value per head is 83 cents, making their total equalized value \$330,009.

Of the number assessed, 22 per cent, or 87,472, were marketed; their average gross weight being 108 pounds, and the total gross weight 9,425,024 pounds. The average price received for those marketed prior to December 1 was \$4.90 per hundred weight, making their total value \$462,316.

The supply of sheep on hand December 1, 1907, was 90 per cent, as compared with last year, and the average price per hundred weight \$4.45.

CROP REPORT.

29

The following table gives the number, weight and value of the sheep marketed in this State since 1855:

YEAR.	Assessors' Returns.		Estimated per cent marketed.	Number fat sheep marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value sheep marketed.
	Number.	Value.

WOOL.

There were 1,787,960 pounds of wool shorn in 1907.

The average price per pound was 25 cents, and the total value of the wool clip amounted to \$441,391.

The following table gives the number of pounds shorn, the price per pound and the total value of the wool clip for the last thirty-one years:

YEAR.	Number pounds shorn.	Price per pound.	Total value.
1877.....	3,291,677	\$0 30	\$ 987,503

HORSES.

The number of horses reported by assessors this year is 1,011,288 and their equalized value per head \$14.45, the total value being \$14,613,112.

The number of colts foaled in 1906 was 80,795.

Distemper is reported from Coles, Logan and Randolph counties. Lung fever among horses is reported from Morgan county and sore-tongued horses from Wayne county. Schuyler county reports horses affected by pinkeye.

The following table gives the number of horses assessed in the State since 1855 and their equalized valuation, as well as the number of colts foaled each year since 1878:

YEAR.	Assessors' Returns.		Number colts foaled.
	Number.	Value.

Tables published elsewhere in this report give by counties the quantity and value of the dairy products of the State for 1907.

POULTRY AND EGGS.

The value of the poultry sold in the State in 1907 was \$1,578,391.

In northern Illinois the value of poultry sold was \$958,571, in central Illinois \$392,592 and in the southern division of the State \$227,228.

The value of eggs sold in the State in 1907 was 2 per cent greater than in 1906.

In northern Illinois the value of eggs sold was \$889,387, in central Illinois \$340,742 and in the southern division of the State \$400,485, a total value of \$1,630,614.

SUMMARY.

The following table gives in small space the value of the principal farm products and live stock of Illinois for the year 1907:

Corn	\$111,344,922
✓ Winter wheat.....	19,074,203
Spring wheat.....	1,151,215
✓ Oats	31,708,106
Rye	892,473
✓ Barley	405,811
✓ Buckwheat	19,499
✓ Hay	32,871,936
Timothy seed.....	99,295
✓ Clover seed.....	250,273
✓ Hungarian and millet seed.....	30,210
✓ Irish potatoes.....	4,842,690
Sweet potatoes.....	166,827
✓ Turnips and other root crops.....	64,449
✓ Broom-corn	236,352
✓ Sorghum	179,846
Beans	30,336
Castor Beans.....	121,291
Tobacco	221,437
✓ Other crops not named.....	152,401
✓ Apples	94,826
✓ Peaches	5,968
✓ Pears	1,652
✓ Grapes	13,418
✓ Strawberries	30,386
Watermelons	41,244
Other fruits and berries.....	38,652
Wine	25,196
Honey	40,340
*Horses (equalized value).....	14,613,112
*Beef cattle (equalized value).....	9,275,514

Eggs sold.....	1,630,614
Total.....	\$280,666,020

*NOTE—The equalized value, as fixed by the State Board of Equalization, represents but one-fifth of the actual value.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season and immediately after harvest, when the information as to condition and yield is most needed, to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting conditions, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or 10 per cent, is recorded 110; a decrease of 5 per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for the term of years will be found to closely approximate the assessors' returns.

E. E. MCCOY,

Secretary Pro Tem.

CROP REPORT.

NORTHERN DIVISION.	Average 1907.	Average yield per acre in bushels.	Total yield in bushels.	Price per bushel.	* Value of crop.	Cost of pro- duction per acre.	Total cost of production.	Profit on crop.	Loss on crop.	Average Yield per Acre in Bushels.													Quality com- pared with an average.

- 1888. C. H. Rankin, Fall Creek.
- 1904. A. R. Wallace, Jr., Camp Point.

ALEXANDER COUNTY—

- 1907. J. E. Hedge, McClure.
- 1907. J. L. Vick, Diswood.
- 1907. G. W. Childress, Olive Branch.

BOND COUNTY—

- 1885. J. B. Denny, Sorento.
- 1885. W. H. Taylor, Greenville.
- 1898. L. E. Alexander, Reno.
- 1904. A. O. Donnel, Greenville, R. R.
No. 1.

BOONE COUNTY—

- 1899. O. S. Cohoon, Belvidere.

BROWN COUNTY—

- 1889. W. B. Rigg, Mt. Sterling.
- 1889. C. J. Davis, Limewell.

BUREAU COUNTY—

- 1897. O. W. Mason, Buda.
- 1907. D. D. Draper, New Bedford.
- 1907. Frank J. Nye, Tiskilwa.
- 1907. John Johnson, New Bedford.
- 1907. E. B. Anthony, Tiskilwa.
- 1907. S. G. Soverhill, Tiskilwa.
- 1907. W. R. Kitterman, Tiskilwa.

CALHOUN COUNTY—

- 1881. M. A. Kamp, Kampsville.
- 1906. J. H. Walston, Kampsville.

CARROLL COUNTY—

- 1899. Henry Daehler, Chadwick.
- 1899. Jacob Grossman, Lanark.
- 1900. J. M. Carroll, Argo.

CASS COUNTY—

- 1878. John Beggs, Ashland.
- 1896. W. W. Mathew, Ashland, R. R.
No. 2.
- 1903. M. L. Crum, Virginia.
- 1904. G. J. Armstrong, Chandlerville.

CHAMPAIGN COUNTY—

- 1877. W. A. Conkey, Homer.
- 1885. W. E. Dawley, Seymour, R. F.
D. No. 43.
- 1907. R. E. Chambers, Sadorus.
- 1907. M. O. Stover, Mahomet.
- 1907. Reuben Roughton, Rantoul.

CHRISTIAN COUNTY—

- 1877. John W. Hunter, Pana.
- 1877. A. B. Herdman, Morrisonville.
- 1878. O. S. Nash, Sharpsburg.
- 1897. Basil Hill, Edinburg.
- 1904. J. Earle White, Morrisonville.

CLARK COUNTY—

- 1877. F. B. Ennis, R. F. D. No. 4,
Martinsville.
- 1877. R. R. Scott, Casey.
- 1880. Jerry Ishler, Martinsville.
- 1900. Wilfred Shaw, Darwin.

CLAY COUNTY—

- 1891. Edgar Hays, Iola.
- 1902. Israel Mills, Clay City.
- 1904. Leslie F. Brissenden, Flora.
- 1904. T. O. Pierce, Xenia.
- 1904. Jno. T. Campbell, Louisville.

CLINTON COUNTY—

- 1890. John P. Heimann, Damiansville.
- 1901. Frank Bassler, Trenton.
- 1907. Theo. W. Timmerman, Breese.

COLES COUNTY—

- 1905. John W. Black, Humboldt.
- 1905. James A. Walker, Lerna.
- 1905. E. E. Boyer, Ashmore.

COOK COUNTY—

- 1880. E. Wheeler, Arlington Heights.
- 1907. M. L. Staples, Palatine.
- 1907. John T. Cooper, Orland.
- 1907. C. Doctor, Orland.

CRAWFORD COUNTY—

- 1877. William L. Heustis, Robinson.
- 1882. William Wood, Oblong.
- 1897. W. M. Hart, Annapolis.
- 1900. Clinton Newlin, Hutsonville.
- 1905. Clinton Vaughan, Hutsonville.

CUMBERLAND COUNTY—

- 1882. James M. Albin, Neoga.
- 1887. David B. Green, Toledo.
- 1897. J. L. Mattoon, Greenup.

DE KALB COUNTY—

- 1905. A. J. Plapp, Malta.
- 1906. John L. Storey, Shabbona, R. F. D. No. 2.

DE WITT COUNTY—

- 1882. W. R. Carle, Wapella.
- 1897. W. H. Oglevee, Clinton.

ILLINOIS CROP REPORT

FOR

May 1, 1908.

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE
AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE,
SPRINGFIELD, May 1, 1908.

The information contained in this report was obtained from the reports of correspondents mailed to this department the first day of May.

The correspondents are, as a rule, representative farmers of extended experience who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty years, and their estimates for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number four hundred and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WINTER WHEAT.

Of the 1,319,393 acres seeded last fall for harvest in 1908, it is estimated that 70,722 acres, or about 5 per cent of same, has been winter killed or destroyed by floods, leaving 1,248,671 acres for harvest.

Of the 70,722 acres reported killed, 64,074 acres are reported from the southern division of the State.

The condition of the growing crop on May 1 is given as being 98 per cent of normal. Northern Illinois reports the condition as 100 per cent, central Illinois 101 per cent and the southern division of the State but 94 per cent.

SPRING WHEAT.

The area devoted to spring wheat is reported as being 2 per cent greater than last year, and the May 1 condition is 91 per cent of normal.

CROP REPORT.

OLD WHEAT.

Of the 24,693,328 bushels of wheat raised in Illinois last year, it is estimated that there was on May 1, 2,640,499 bushels, or about 10 per cent, in the producers' hands, northern and central Illinois reporting 10 per cent and southern Illinois 13 per cent of last season's crop still in the producers' hands.

The following table gives the amount of old wheat in first hands the 1st of May, since and including 1880:

YEAR PRODUCED.	Crop in bushels.	Per cent crop on hand following May 1.	Amount crop in producers' hands following May 1.	Surplus wheat above seed and consumption at harvest.	Deficit at harvest.
1880	56,508,309	15	8,476,246	39,851,883
1881	22,374,163	13	2,924,039	5,765,414
1882	52,323,261	15	8,174,634	36,214,133
1883	20,374,572	15	3,208,358	4,575,152
1884	34,367,493	18	6,350,202	17,367,794
1885	8,299,243	14	2,201,904	5,439,786
1886	28,284,068	15	4,000,931	12,082,999
1887	38,076,468	13	5,034,875	21,842,119
1888	33,916,920	12	4,022,569	17,334,947

1905	22,459,320	10	2,267,322	1,184,844
1906	28,458,122	11	3,078,034	7,197,382
1907	24,693,328	11	2,640,499	3,483,443
Average.....	26,845,988	13	3,518,166	12,461,236	4,844,778

WINTER RYE.

There were 67,400 acres reported sowed to rye last fall, and the May 1 report shows that but 1 per cent of it has been winter killed, leaving 66,485 acres for harvest.

The May 1 condition is given in northern Illinois as 100 per cent of normal, in central Illinois 98 per cent and in the southern division of the State as 94 per cent, a State average of 97 per cent.

OATS.

Owing to the very unfavorable conditions which have existed for seeding this crop, the area seeded to oats for the 1908 crop is but 90 per cent, as compared with the area seeded in 1907, the deficiency in area coming largely from the southern division of the State, which reports the area as being only 74 per cent as compared with last year.

The May 1 condition of oats is 97 per cent of normal in northern Illinois, 94 per cent in central Illinois and but 79 per cent in the southern division of the State, giving a State average of 90 per cent.

BARLEY.

The area devoted to barley in northern Illinois this year is 2 per cent greater than in 1907, and the May 1 condition of the crop is reported as being 97 per cent of a seasonable average.

No barley is reported from the central and southern divisions of the State.

OLD CORN.

The Illinois corn crop of 1907, as reported to this department, was 254,608,895 bushels. Of this amount, our May 1 report shows that there is 23 per cent, or 58,870,966 bushels, in the producers' hands, as follows: Northern Illinois reports 26,818,384 bushels in first hands, central Illinois 25,739,910 bushels and the southern division of the State 6,312,672 bushels.

Livingston county produced the largest corn crop of any county in the State last year, 13,936,400 bushels.

The following table gives the amount of old corn in the producers' hands May 1, the past twenty-nine years, as well as the extent of the crop produced each year:

YEAR PRODUCED.	Crop.	Per cent corn on hand following May 1.	Bushels corn in producers' hands following May 1.
1879	305,913,277	32	99,229,889
1880	250,697,036	28	71,929,343
1881	174,491,706	21	37,445,964
1882	179,471,729	24	43,450,857
1883	186,583,558	21	39,478,621
1884	207,556,662	24	50,102,264
1885	230,922,298	24	57,047,027
1886	182,755,053	24	43,346,028
1887	129,537,603	18	23,573,279

1905	309,316,053	31	95,836,758
1906	284,077,262	32	91,150,405
1907	254,608,895	23	58,870,966
Average	232,827,952	29	69,192,873

MEADOWS.

The area devoted to meadows is 99 per cent as compared with last year.

Their May 1 condition is excellent, being 101 per cent of a seasonable average in both Northern and Central Illinois and 98 per cent, in the Southern division of the State.

PASTURES.

There is a deficiency of 2 per cent in the area devoted to pastures this year, as compared with 1907.

The weather has been very favorable for the growth of pastures, the May 1 condition of same being 101 per cent of normal in Northern Illinois, 102 per cent in Central Illinois and 99 per cent in the Southern division of the State.

SPRING PLOWING.

Usually by May 1st, 65 per cent of the spring plowing is done, but our correspondents report that only 45 per cent of the amount of spring work usually completed by May 1, had been done this spring.

The condition of the soil is reported as being heavy and hard to work, due to lack of freezing during the winter and excess of moisture this spring.

LIVE STOCK.

HORSES.

The number of horses reported on May 1 is 97 per cent as compared with 1907.

Distemper is reported from Peoria, Ford, Logan, McLean, Sangamon, Bond, Randolph and Wayne counties, and catarrhal fever from Cass and Macoupin.

Loss of colts from abortion is reported from Putnam and McLean counties.

Many work horses died during latter part of winter from stomach and bowel trouble in Lake county. Many young colts died of scours, when a week or two old in Christian county.

Ford county reports pinkeye and Williamson county reports the death of a few horses, caused by attacks of buffalo gnats.

With the above exceptions the general condition of horses is good, being 98 per cent of normal in both the Northern and Central divisions and 96 per cent in the Southern division of the State.

MULES.

There is a deficiency of 5 per cent in the number of mules in the State this year as compared with 1907 and their May 1 condition is 98 per cent of normal.

CATTLE.

The number of cattle reported this year is 91 per cent as compared with 1907.

Their May 1 condition is 97 per cent of normal, being 97 per cent in Northern Illinois, 98 per cent in Central Illinois and 95 per cent in the Southern division of the State.

Vermilion county reports some deaths among cattle, due to pleuro-pneumonia.

DAIRY COWS.

In Northern Illinois the number of dairy cows reported this year is 97 per cent, as compared with 1907 and 98 per cent, in the central and southern divisions of the State.

Their May 1 condition is 98 per cent of normal, being 97 per cent in Northern Illinois, 99 per cent in Central Illinois and 98 per cent in the Southern division of the State.

HOGS.

The number of hogs on hand May 1 as compared with last year is but 86 per cent. Their May 1 condition is 95 per cent of normal, being 95 per cent in Northern Illinois, 97 per cent in Central Illinois and 93 per cent in the Southern division of the State.

Hog cholera is reported from Bureau, Champaign, Edgar, Sangamon, Vermilion and Williamson counties while Pulaski county reports hogs dying with blind staggers.

SHEEP.

The number of sheep on hand May 1 is 97 per cent as compared with 1907.

Their May 1 condition is 97 per cent of normal, being 97 per cent in Northern Illinois, 98 per cent in Central Illinois and 96 per cent in the Southern division of the State.

FRUIT.

The prospect for the fruit crop of 1908 was most encouraging until the 27th or 28th of April, up to which time there had not been frost sufficient to do but little damage.

In the northern division of the State the buds had not advanced so far as to be endangered by any frosts up to the latter part of April. The frosts of April 29th and 30th seem to have injured the fruit very seriously, but to just what extent our correspondents were unable to determine when making their reports on May 1.

Bureau, Henderson, Henry, Kane, Kankakee, Knox, Lee, Mercer, Ogle, Peoria, Putnam, Warren, Winnebago, Adams, Cass, Christian, Coles, DeWitt, Edgar, Ford, Fulton, Greene, Logan, McDonough, Menard, Montgomery, Morgan, Pike, Schuyler, Scott, Shelby, Taxewell, Alexander, Clay, Clinton, Hamilton, Jackson, Jefferson, Madison, Massac, Monroe, Perry, Pulaski, St. Clair, Union, Washington and Williamson counties report injury to fruit from frost, while many other correspondents at time of making report, mention cold dam weather and feared that a frost was imminent and that fruit would be greatly injured as a result of such unseasonable weather conditions.

WAGES PAID FARM HANDS.

On account of many factories and mines being idle, the supply of farm hands this spring, comes nearer filling the demand than for several years past. The demand for good farm hands the past few years has exceeded the supply in every section of the State, but our correspondents report the supply this year as being in excess of the demand in many of the counties of the State, the average supply for the State being 92 per cent of the demand.

The average wages paid farm hands during the last twenty-nine years is given in the following table:

DIVISION.	PER DAY.		PER MONTH.	
	With board.	Without board.	With board.	Without board
Northern	\$1 05	\$1 35	\$20 95	\$28 75
Central	90	1 15	18 70	25 15
Southern	70	95	15 25	21 35
Average	\$0 90	\$1 15	\$18 30	\$25 10

The wages paid farm help in the three divisions of the State, during the past twenty-nine years, are given in the following tables:

NORTHERN DIVISION.

YEAR.	PER DAY.		PER MONTH.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase, of one-tenth, or ten per cent, is recorded 110; a decrease of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not intended that these reports will exactly coincide with the official assessors' returns, but they do not represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

J. K. DICKIRSON, *Secretary*.

ILLINOIS CROP REPORT

FOR

JUNE 20, 1908.

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE
SPRINGFIELD, JUNE 20, 1908.

The information contained in this report was obtained from the reports of correspondents mailed to his office the twentieth of June.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number four hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

Corn.

A decrease of 10 per cent is reported in the area devoted to corn as compared with 1907.

Northern Illinois reports 97 per cent of an area as compared with last year, Central Illinois 91 per cent and Southern Illinois 83 per cent.

The June 20 condition of this crop is but 75 per cent of a seasonable average, Northern Illinois reporting 82 per cent, Central Illinois 71 per cent and Southern Illinois 74 per cent.

The late spring and excessive rainfall has caused the corn to be very backward. Much replanting of corn was necessitated in many counties, due to large areas having been drowned out.

Corn has been damaged in many counties by cut wire and grub worms.

The earliest appearance of corn above ground this year was April 20, which date was reported from both Clark and Pulaski counties, but most of it appeared between May 15th and June 1st.

The quality of seed corn is reported as better than last year, being 96 per cent of an average.

Northern and Central Illinois report the quality as 97 per cent of an average and Southern Illinois 94 per cent.

BROOM CORN.

The area devoted to broom corn is 90 per cent as compared with 1907. In Northern Illinois the area is 95 per cent, in Central Illinois 84 per cent and in Southern Illinois 92 per cent.

The June 20 condition of this crop is reported as being only 76 per cent of a seasonable average, being 70 per cent in Northern and Central Illinois and 89 per cent in the Southern Division of the State.

SORGHUM.

The acreage of sorghum as compared with 1907 is reported as being 91 per cent, Northern Illinois reporting 99 per cent, Central Illinois 87 per cent and Southern Illinois 86 per cent.

In Northern Illinois the June 20 condition is 85 per cent of normal, in Central Illinois 79 per cent and in Southern Illinois 80 per cent, a state average of 81 per cent.

WINTER WHEAT.

Northern Illinois reports the condition as 96 per cent of normal, Central Illinois, 92 per cent and Southern Illinois but 77 per cent.

Many wheat fields in the Southern division of the State were damaged greatly by floods.

Rust in wheat is reported from Adams, Morgan, Hancock, Logan, Clinton, Jackson, Pope, Pulaski and Williamson counties. Logan, Shelby, Clinton, Crawford and Randolph counties report Hessian fly in wheat.

June 8th was the earliest date harvest commenced, several counties in the extreme southern part of the State reporting that date.

SPRING WHEAT.

The area in Northern Illinois, where practically all the spring wheat is raised, show an increase of 2 per cent as compared with last year.

The condition June 20th is 94 per cent of normal, an increase of 3 points over the May 1 condition.

OATS.

The June 20 condition of this crop is but 75 per cent of normal, a decrease of 15 points since the May 1 report.

Northern Illinois reports the June 20 condition as 91 per cent of normal, Central Illinois 74 per cent and Southern Illinois but 60 per cent.

Rust is reported from McHenry, Cass, Christian, Morgan, Moultrie, Sangamon, Schuyler, Shelby, Tazewell, Jefferson, Perry, Pope, Randolph, Saline, St. Clair, Union, Wabash, Washington and Wayne counties.

RYE.

The June 20 condition of rye is reported as 97 per cent of a seasonable average in Northern Illinois, 93 per cent in Central Illinois and 84 per cent in the Southern division of the State, a State average of 91 per cent and a decrease of 6 points since the May 1 report.

BARLEY.

The June 20 condition of barley in Northern Illinois, where practically all this crop is grown, is 95 per cent of normal, a decrease of 2 points since the May 1 report.

MEADOWS.

The area devoted to meadows is 99 per cent as compared with 1907.

Northern Illinois reports the area as compared with last year as 99 per cent, Central Illinois 97 per cent and Southern Illinois 100 per cent.

The June 20 condition of meadows is 95 per cent of normal, Northern Illinois reporting 105 per cent, Central Illinois 98 per cent and the Southern division of the State 82 per cent.

CLOVER.

There is a decrease of 1 per cent in the area devoted to clover this year, as compared with 1907.

Northern Illinois reports the area as 106 per cent, Central Illinois 101 per cent and Southern Illinois 91 per cent.

The June 20 condition of clover is 106 per cent of normal in Northern Illinois, 100 per cent in Central Illinois and 90 per cent in the Southern division of the State.

HUNGARIAN MILLET.

In Northern Illinois the area of Hungarian and millet is 99 per cent as compared with last year, in Central Illinois 103 per cent and in the Southern division of the State 89 per cent.

PASTURES.

There is a deficiency of 2 per cent in the area of pastures as compared with 1907.

The weather has been very favorable for the growth of pastures, their June 20 condition being reported as 101 per cent of normal.

Northern Illinois reports their condition as 107 per cent of normal, Central Illinois 102 per cent and the Southern division of the State 95 per cent.

IRISH POTATOES.

The area devoted to Irish potatoes is 98 per cent as compared with last year in Northern Illinois, 93 per cent in Central Illinois and 87 per cent in Southern Illinois.

Their June 20 condition is 83 per cent of normal, being 91 per cent in Northern Illinois, 82 per cent in Central Illinois and 77 per cent in the Southern division of the State.

SWEET POTATOES.

There is a decrease of 8 per cent in the area devoted to sweet potatoes as compared with 1907.

Northern Illinois reports a decrease of 7 per cent, Central Illinois 8 per cent and Southern Illinois 9 per cent.

Their June 20 condition is 100 per cent of normal in Northern Illinois, 86 per cent in Central Illinois and 88 per cent in the Southern division of the State.

FIELD BEANS.

The area devoted to field beans is 8 per cent less than a year ago, Northern and Central Illinois reporting a decrease of 6 per cent each in the area and Southern Illinois 12 per cent.

Their June 20 condition is 95 per cent of normal in both Northern and Central Illinois and 88 per cent, in the Southern division of the State.

COW PEAS.

The area in cow peas as compared with 1907 is 95 per cent in Northern Illinois, 93 per cent in Central Illinois and 93 per cent in the Southern division of the State.

CROP REPORT.

TOBACCO.

The area of tobacco, in JoDaviess county, which is the only county in Northern Illinois reporting on this crop, is 100 per cent as compared with last year and the June 20 condition is 100 per cent of normal.

No tobacco is reported from Central Illinois.

The southern division of the State reports a deficiency of 15 per cent, in the area of tobacco as compared with 1907 and the June 20 condition, 87 per cent of a seasonable average.

FRUIT.

The reports of our correspondents are not encouraging for a very large fruit crop this year.

The late frosts of April injured fruit in JoDaviess, Knox, Livingston, Stephenson, Calhoun, Christian, Fulton, Greene, Hancock, Mason, Menard, Fayette, Jackson and Union counties.

Fruit is dropping badly in Champaign, Douglas, Jersey, Macon, Menard, Pike, Schuyler, Tazewell, Effingham, Hamilton, Hardin and Wayne counties.

CHERRIES.

Northern Illinois reports the yield of cherries as 61 per cent of normal, Central Illinois 65 per cent and Southern Illinois 57 per cent.

STRAWBERRIES.

Northern Illinois reports the yield of strawberries as 92 per cent of normal and Central and Southern Illinois 78 per cent respectively.

RASPBERRIES.

The yield of raspberries in Northern Illinois is reported as 89 per cent of a seasonable average, in Central Illinois 85 per cent and in the Southern division of the State 83 per cent.

GOOSEBERRIES.

The yield of gooseberries in Northern Illinois is reported as being 81 per cent of a seasonable average, 83 per cent in Central Illinois and 82 per cent in the Southern division of the State.

CURRANTS.

In Northern Illinois the yield of currants is 84 per cent of an average, in Central Illinois 83 per cent and in Southern Illinois 81 per cent.

VINEYARDS.

In both Northern and Central Illinois the area of vineyards is 97 per cent as compared with 1907 and 93 per cent in the Southern division of the State.

The June 20 condition of vineyards is 90 per cent of normal in Northern Illinois, 95 per cent in Central Illinois and 93 per cent in the Southern division of the State.

YOUNG LIVE STOCK.

PIGS.

There is a decrease of 11 per cent in the number of pigs farrowed this year as compared with 1907.

Northern and Central Illinois reporting a decrease of 12 per cent and Southern Illinois of 10 per cent.

The June 20 condition of pigs is reported as 94 per cent in Northern Illinois, 95 per cent in Central Illinois and 93 per cent in Southern Illinois.

LAMBS.

The number of lambs reported this year is 93 per cent as compared with 1907. In Northern and Central Illinois the number is 94 per cent and in Southern Illinois 92 per cent.

The June 20 condition of lambs is 97 per cent of normal in both Northern and Central Illinois and 96 per cent in the Southern division of the State.

CALVES.

The number of calves reported this year is 96 per cent as compared with 1907 in Northern Illinois and 95 per cent in both Central and Southern divisions of the State.

Their June 20 condition is 99 per cent of normal in both Northern and Central Illinois and 98 per cent in Southern Illinois.

COLTS.

The number of colts foaled this year as compared with 1907 is 95 per cent, being 93 per cent in Northern Illinois, 97 per cent in Central Illinois and 96 per cent in the Southern division of the State.

Their June 20 condition is 98 per cent of normal in Northern Illinois and 97 per cent in both Central and Southern Illinois.

The average value of colts at weaning time is reported as \$48 per head in Northern Illinois, \$54 in Central Illinois and \$51 in Southern Illinois.

The number of colts lost prior to weaning time is reported as 9 per cent in Northern Illinois, 7 per cent in Central Illinois and 6 per cent in the Southern division of the State.

The average cost of service of stallions was \$13 in both Northern and Central Illinois and \$10 in the Southern division of the State.

WOOL.

The wool clip of 1908 was 4 per cent less than that of 1907. In Northern Illinois it was 97 per cent, in Central Illinois 96 per cent and in Southern Illinois 94 per cent.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase, of one-tenth, or ten per cent, is recorded 110; a decrease of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

J. K. DICKIRSON,
Secretary.

ILLINOIS CROP REPORT

FOR

AUGUST 1, 1908.

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE
SPRINGFIELD, AUGUST 1, 1908.

The information contained in this report was obtained from the reports of correspondents mailed to this office the first of August.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number four hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WHEAT.

The area seeded to wheat for the crop of 1908 was 1,383,680 acres, all but 66,401 acres being winter wheat.

Five per cent of the winter wheat area was winter killed or destroyed by floods, leaving 1,321,224 acres of wheat (spring and winter) for harvest.

The average yield per acre was 14 bushels and the total yield 19,508,260 bushels.

The ruling price of wheat on August 1 was 84 cents per bushel, the entire value of the crop at this price being \$16,344,436.

In the southern division of the State the yield is not as large nor the quality as good as in northern and central Illinois, due to the excessive rains of the spring.

Hessian fly in wheat is reported from Logan county and joint worms from Lawrence county. Rust is reported from Williamson county.

CROP REPORT.

The following table gives the area, yield and value of the wheat crop of the State during the past forty-eight years:

WHEAT (SPRING AND WINTER.)

YEAR.	Number of acres harvested.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

WHEAT CONSUMPTION.

In estimating the amount of wheat required in the State for seed and bread it is necessary to consider the entire area seeded instead of that harvested, as the amount required for seed is based on the area seeded last year, which was 1,383,680 acres. As one and one-third bushels per acre is used for seed, it will require 1,844,912 bushels to seed next year's crop.

Allowing four bushels per capita for food, it takes, according to the 1900 census, which gives Illinois 4,821,550 inhabitants, 19,286,200 bushels for that purpose, so that 21,131,112 bushels will be required for home use.

As but 19,508,260 bushels were raised in this State this year, it will be necessary to import 1,622,852 bushels or equivalent in flour to fill the demands of the home market.

OATS.

The area devoted to oats this year is the smallest seeded for 16 years, being but 2,815,233 acres. Northern Illinois reports 1,695,920 acres, central Illinois 899,297 acres and southern Illinois 220,016 acres.

The average yield per acre for the State is 25 bushels and the total yield 70,493,675 bushels.

Rust is reported from Carroll, Henry, Kendall, Knox, Lee, Ogle, Peoria, Putnam, Warren, Whiteside, Winnebago, Hancock, Macoupin, McDonough, Menard, Morgan, Pike, Sangamon, Schuyler, Tazewell, Bond, Crawford, Lawrence, Madison, Marion, Pope, Randolph and Wayne counties. Green lice are reported from Wayne county.

The prevailing price of oats August 1 was 44 cents per bushel and the value of the crop at this price amounted to \$31,158,168.

The following table gives the area, yield and value of the oats crop of the State during the past forty-eight years:

YEAR.	Number of acres	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of the oats crop in each county in the State this year.

RYE.

There is a decrease of about 2,000 acres in the area devoted to rye this year, as compared with 1907, the area harvested this year being 68,439 acres. The average yield per acre was 19 bushels and the total yield amounted to 1,310,290 bushels.

The average price per bushel on August 1 was 67 cents, and at that price the crop of 1908 is worth \$873,626.

CROP REPORT.

7

The following table gives the area, yield and value of the past forty-eight rye crops grown in the State:

YEAR.	Number of acres	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.
1860.	59,455	16	951,281	\$0 49	\$ 466,127	\$ 7 87	\$ 9 80	\$ 582,659		\$ 116,532

A table published elsewhere in this report gives the area, yield and value of rye in each county in the State.

BARLEY.

There is but little barley grown in central and southern Illinois, and of the 30,233 acres devoted to this crop this year, 28,713 acres are reported from the northern division of the State.

The average yield is 29 bushels per acre and the total yield 883,533 bushels.

The August 1 price of barley is reported as being 53 cents per bushel, making this crop worth \$470,056.

The following table gives the area, yield and value of the last forty-eight barley crops produced in the State:

YEAR.	Number of acres	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

In a table published elsewhere in this report will be found the area, yield and value of the barley crop in the State by counties.

HAY.

The area devoted to meadows is 2,303,336 acres and the average yield of 1 $\frac{1}{2}$ tons is the highest reported since 1903.

The total yield amounted to 3,616,562 tons, and at the average price of \$7.25 per ton on August 1 the crop was worth \$26,242,606.

The yield of clover hay was 2 tons per acre in northern Illinois. 1 $\frac{3}{4}$ tons in central Illinois and 1 $\frac{1}{2}$ tons in the southern division of the State.

The August 1 condition of clover is excellent, being 96 per cent of normal in northern Illinois and 98 per cent in both the central and southern divisions of the State.

The following table gives the area, yield and value of the last forty-eight hay crops produced in this State:

YEAR.	Number of acres	Average yield per acre—tons.	Tons produced.	Price per ton.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

CORN.

There is a decrease of 514,366 acres in the area devoted to corn this year as compared with 1907, the total acreage for 1908 being reported as 6,780,507.

The decrease in area is largely due to the wet weather in the early part of the season, which delayed farm work and made it impossible for farmers to put in as large an acreage as usual.

The August 1 condition of the crop is 80 per cent of normal in northern and southern Illinois and 76 per cent in central Illinois, a State average of 79 per cent. This is an increase of four points since our June 20th report.

Corn is reported as from two to four weeks late, but with seasonable weather and a late fall will promise well for an average crop.

Corn was suffering from lack of rain in half the counties of the State when correspondents made their report on August 1, Livingston, Peoria, Macon, McLean, Morgan and Crawford counties report corn as firing.

Insects such as grubs, root lice, cut worms and ants are reported from Cook, Kendall, Knox, LaSalle, Will, Champaign, Christian, Douglas, Logan, Macoupin, McLean, Moultrie, Schuyler, Jasper, Lawrence, Wayne and Williamson counties. Chinch bugs are reported from Clinton and Washington counties.

BROOM CORN.

The August 1 condition of broom corn was 80 per cent of a seasonable average in northern Illinois, 79 per cent in central Illinois and 82 per cent in the southern division, a State average of 80 per cent.

SORGHUM.

The August 1 condition of sorghum was 86 per cent of normal in both northern and central Illinois and 85 per cent in the southern division of the State.

PASTURES.

Northern Illinois reports the area of pastures 2,108,657 acres, central Illinois 1,375,016 acres and southern Illinois 538,925 acres, a total area of 4,022,598 acres and a decrease of 284,740 acres from the area reported in 1907.

The August 1 condition of pastures is reported as 92 per cent of normal, being 95 per cent in northern Illinois, 94 per cent in central Illinois and 86 per cent in the southern division of the State.

Pastures were badly in need of rain, the drought of July being general throughout the State.

IRISH POTATOES.

There is a decrease of four points in the condition of Irish potatoes since the June 20th report was issued.

The August 1 condition was 79 per cent of normal, being 85 per cent in northern Illinois, 78 per cent in central Illinois and 73 per cent in the southern division of the State.

SWEET POTATOES.

The August 1 condition of this crop is 90 per cent of normal in northern Illinois, 88 per cent in central Illinois and 84 per cent in the southern division of the State.

BUCKWHEAT.

The area devoted to buckwheat is reported the same as last year.

In the northern division of the State the August 1 condition of buckwheat is 96 per cent of normal, in the central division 97 per cent and 95 per cent in the southern division of the State.

TURNIPS AND OTHER ROOT CROPS.

The area in northern Illinois of turnips and other root crops is 96 per cent, as compared with 1907, in central Illinois 93 per cent and in southern Illinois 94 per cent.

The August 1 condition of these crops is 91 per cent of a seasonable average in northern Illinois, 89 per cent in central Illinois and 85 per cent in southern Illinois, a State average of 88 per cent.

TOBACCO.

The condition of tobacco in northern Illinois, where but two counties report on this crop, is 98 per cent of normal, in central Illinois 102 per cent and 78 per cent in the southern division of the State.

CASTOR BEANS.

The condition of castor beans in the southern division of the State, which is the only division reporting on this crop, is 90 per cent of normal.

COW PEAS.

In northern Illinois the August 1 condition of cow peas was 90 per cent of normal, in central Illinois 93 per cent and in southern Illinois 89 per cent.

FIELD BEANS.

The August 1 condition of the crop is 90 per cent of normal in northern Illinois, 97 per cent in central Illinois and 92 per cent in the southern division of the State.

ALFALFA.

The raising of this crop is but in the experimental stage, according to the reports of our correspondents.

About seventy counties in the State report a small area devoted to alfalfa. Ogle county reports the largest area, 2,200 acres, and the condition as excellent.

FRUIT.

But very few counties make encouraging reports on the fruit crop.

The apple crop is a failure. Though some trees are laden with fruit, they are reported of inferior quality and dropping badly. Fruit was greatly damaged by frost and by cool, wet weather at time of blooming.

APPLES.

The August 1 condition of apples in northern Illinois was 55 per cent of normal, in central Illinois 41 per cent and in the southern division of the State but 26 per cent.

PEACHES.

Northern and central Illinois report the August 1 condition of peaches as 76 per cent of a seasonable average and southern Illinois but 38 per cent.

PEARS.

The August 1 condition of pears was 66 per cent in northern Illinois, 59 per cent in central Illinois and 38 per cent in the southern division of the State.

PLUMS.

Northern Illinois reports the August 1 condition of plums as 56 per cent of normal, central Illinois 64 per cent and southern Illinois as 47 per cent.

GRAPES.

The August 1 condition of grapes is 88 per cent of a seasonable average in northern Illinois, 91 per cent in central Illinois and 87 per cent in the southern division of the State.

BLACKBERRIES.

The blackberry crop this year was 88 per cent of an average yield, being 86 per cent in northern Illinois, 89 per cent in central Illinois and 90 per cent in the southern division of the State.

QUINCES.

But few quinces are reported from northern Illinois, where their August 1 condition is 70 per cent of normal. Central Illinois reports the condition of quinces as 75 per cent and southern Illinois as 60 per cent, a State average of 68 per cent.

CROP REPORT.

LIVE STOCK.

Live stock generally has been in excellent condition this season, although there are a few reports of disease from some localities.

Cook county reports anthrox. Pinkeye among cattle is reported from LaSalle and Marshall counties and is affecting horses and mules in Pulaski county.

Distemper is reported from Logan county and hog cholera from Brown, Calhoun, Edgar, Schuyler, Johnson and Pulaski counties.

Flies are reported as unusually troublesome to live stock in DeKalb, Kane, Ogle and Jasper counties.

DRAIN TILE.

So far as can be ascertained, there are now 736,978,833 feet of drain tile in the State, which gives an average of 27 feet to each acre of cultivated land in Illinois.

In northern Illinois the average number of feet per acre is 42, in central Illinois 30, while in the southern division of the State few counties average as much as 1 foot per acre.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase, of one-tenth, or ten per cent, is recorded 110; a decrease of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

J. K. DICKIRSON,
Secretary.

ILLINOIS CROP REPORT

FOR

DECEMBER 1, 1908.

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE
SPRINGFIELD, December 1, 1908.

The information contained in this report as to the acreage of crops and number of head of live stock was obtained from the reports of assessors made to this Department as required by law.

The data in regard to yield per acre, price of crops and value of crops and live stock was obtained from crop correspondents, who number three hundred and fifty, and represent every section of the State.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty-one years, and their estimates, for a term of years, when compared with subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WINTER GRAIN.

WHEAT.

A decrease of 15 per cent is reported in the area seeded to wheat this fall, as compared with 1907, 1,064,893 acres being reported.

This decrease in the wheat area is due to the dry weather which prevailed at seeding time.

Northern Illinois reports 32,861 acres, central Illinois 556,898 acres and southern Illinois 475,134 acres.

The December 1 condition of the growing crop is 71 per cent of normal, being 78 per cent in northern Illinois, 76 per cent in central Illinois and 59 per cent in the southern division of the State.

This unfavorable condition of winter wheat is due to lack of moisture at seeding time and the drought, which was general throughout the State, broken by rain the last week in November.

Hessian fly in wheat is reported from St. Clair and Wabash counties.

CROP REPORT.

RYE.

There is a decrease of 20 per cent in the area seeded to rye, as compared with last year, but 54,494 acres being reported.

Northern Illinois reports 43,674 acres, central Illinois 8,252 acres and southern Illinois 2,568 acres.

The condition of this crop December 1 is 77 per cent of a seasonable average, being 83 per cent in northern Illinois, 84 per cent in central Illinois and 65 per cent in the southern division of the State.

CORN.

The area devoted to corn this year, 6,780,500 acres, is 7 per cent less than in 1907, when 7,295,000 acres were reported.

This decrease in area is largely due to the wet weather in the early part of the season, which delayed farm work and made it impossible for farmers to put in as large an average as usual.

Northern Illinois reports 2,887,897 acres, central Illinois 3,035,000 acres and southern Illinois 857,610 acres.

The average yield per acre in northern Illinois is 33 bushels, in central Illinois 32 bushels and in southern Illinois 26 bushels, a State average of 31 bushels.

The total corn crop of the State in 1908 amounted to 213,366,624 bushels, of which 94,613,268 bushels were produced in northern Illinois, 96,464,437 bushels in central Illinois and 22,288,919 bushels in the southern division of the State.

The ruling price of corn December 1 was 57 cents per bushel, making the total value of the crop \$121,160,615.

The quality of the grain is 91 per cent of normal, being 96 per cent in northern Illinois, 90 per cent in central Illinois and 88 per cent in the southern division of the State.

Insects, such as cut and wire worms and root lice, injured corn in DuPage, Grundy, Henderson, Kankakee, Kendall, LaSalle, Lee, Marshall, Peoria, Champaign, Christian, Clark, Edgar, Fulton, Montgomery, Morgan, Moultrie, Schuyler, Shelby, Vermillion, Bond, Effingham, Jasper, St. Clair, Wabash and Wayne counties. Chinca bugs injured corn in Washington county and green bugs in corn are reported from Christian and White counties.

The area, yield and value of the corn crop of the State for the past forty-nine years is given in the following table.

YEAR.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel—cents.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

CROP REPORT.

BROOM CORN.

The area devoted to broom corn is reported as 6,374 acres.

The average yield per acre was 750 pounds, the total yield being 4,528,000 pounds.

The ruling price December 1 was \$89 per ton, the total value of the crop being \$202,570.

The following table gives the area, yield and value of the broom-corn crop of Illinois since 1876:

YEAR.	Acreage.	Av. yield per acre— lbs.	Total yield— lbs.	Price per ton.	Value of crop.
1877.....	14,566	458	6,674,747	\$71 20	\$237,594
1878.....	18,258	614	11,218,168	49 50	277,645
1879.....	17,664	632	11,161,238	86 75	484,195

SORGHUM.

A decrease of 427 acres is noted in the area devoted to sorghum this year, but 3,221 acres being reported. The average yield per acre was 85 gallons, the total yield being 273,393 gallons.

The ruling price December 1 was 55 cents per gallon, the total value of the product being \$150,637.

The following table gives the area, yield and value of the sorghum crops produced in the State since 1876:

YEAR.	Acreage.	Av. yield per acre— gallons.	Total number of gallons.	Price per gallon.	Value of crop.
1877.....	19,335	63	1,237,164	\$0 42	\$515,409

BUCKWHEAT.

There is a slight increase this year in the area devoted to buckwheat as compared with 1907, 2,435 acres being reported:

The average yield per acre was 13 bushels and the total yield 32,887 bushels.

The ruling price December 1 was 78 cents per bushel, making the total value of the crop \$25,524.

The following table gives the area, yield and value of the buckwheat crop in this State for the past thirty-two years:

YEAR.	Acreage.	Av. yield per acre— bushels.	Total number of bushels.	Price per bushel.	Value of crop.
1877.....	15,880	13	207,693	\$0 73	\$151,612

CROP REPORT.

BEANS.

But 829 acres are reported as devoted to beans in 1908.

The average yield per acre was 15 bushels and the total yield 12,162 bushels.

The ruling price December 1 was \$2.40 per bushel, the total value of the crop at this price being \$29,286.

The following table gives the area, yield and value of the 1908 crop of beans, together with those of thirty-one years preceding:

YEAR.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.

TOBACCO.

But 2,303 acres are reported as devoted to tobacco in 1908, of which 2,123 acres are in the southern division of the State.

The average yield per acre was 670 pounds, the total yield being 1,543,050 pounds.

The total value of the crop at the ruling price December 1 was \$127,351, an average price per pound of 8 cents.

The following table gives the area, yield and value of the crop in this State since 1876:

YEAR.	Acreage.	Av. yield per acre— pounds.	Total number of pounds.	Price per pound.	Value of crop.

PASTURES.

The area devoted to pastures in 1908 is reported as 4,022,598 acres.

The average value per acre was \$4.30 and the total value of pastures was \$17,395,950.

In northern and central Illinois, where most of the pasture lands are located, the value is \$4.60 and \$4.50 per acre, respectively, and in the southern division of the State but \$2.95.

The following table gives the area and value of pastures for thirty-two years past:

YEAR.	Acreage.	Value per acre.	Value of crop.
1877.....	4,367,603	\$3 38	\$14,764,112

IRISH POTATOES.

The area devoted to Irish potatoes this year is reported as being 73,677 acres.

The average yield per acre is 75 bushels and the total yield amounted to 5,514,441 bushels.

The average price per bushel December 1 was 80 cents, making the total value of the crop \$4,353,447.

The following table gives the area, yield and value of the Irish potato crops of the State since 1859 :

YEAR.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

SWEET POTATOES.

The area devoted to sweet potatoes in 1908 was 2,852 acres.

The total yield was 234,245 bushels, an average of 82 bushels per acre.

The ruling price December 1, was 95 cents per bushel, and the total value of the crop at this price amounted to \$222,610.

The following table gives the area, yield and value of the sweet potato crop of the State for the past thirty-two years.

YEAR.	Acreage.	A.v. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.

TURNIPS AND OTHER ROOT CROPS.

A decrease of six per cent. is reported in the area devoted to turnips and other root crops this year, as compared with 1907, but 384 acres being reported.

The average value per acre is \$141.90, and the total value \$54,490.

The average yield of turnips per acre was 97 bushels.

The following tables gives the acreage and value of turnips and other root crops grown in the State during the past thirty-two years:

YEAR.	Acreage.	Value per acre.	Value of crop.
1877.....	7,056	\$39 55	\$279,136
1878.....	3,775	40 85	154,140
1879.....	3,139	230 15	722,444

1907.....	409	157 58	64,449
1908.....	384	141 90	54,490

OTHER CROPS NOT NAMED.

There are a number of crops raised in this State which are cultivated only in limited localities, and are not of sufficient importance to be tabulated alone, but are of considerable value to producers. The value of these miscellaneous crops for 1908 was reported as \$160,542, of which amount \$153,621 was reported from the northern division of the State.

FRUIT.

On account of the meagre statistics furnished this department on the fruit crop, viz: apples, peaches and pears, a correct estimate cannot be given.

APPLES.

But 38,035 bushels of apples are reported produced this year.

The average price per bushel is reported as \$1.40, making the total value \$53,673.

The following table gives the number of bushels of apples and the value of the crops since 1876:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	5,395,351	\$0 80	\$4,316,281
1878.....	4,940,811	65	3,211,527

CROP REPORT.

PEACHES.

There were, according to reports, 2,816 bushels of peaches produced in Illinois in 1908.

The average price per bushel was \$1.10, giving a total value of \$3,142.

The following table gives the quantity and value of the peaches produced in the State during the past thirty-two years:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	402,587	\$0 92	\$370,280

PEARS.

There were but 564 bushels of pears reported produced in 1908.

At the average price of \$1.50 per bushel, the total value of the crop amounted to \$835.

The following table gives the extent and value of the pear crop of the State since and including 1877:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	16,318	\$1 35	\$22,704
1878.....	13,510	1 25	16,887

GRAPES.

There were 511,201 pounds of grapes produced in 1908. Of this amount 68,592 pounds were produced in Northern Illinois, 182,665 pounds in Central Illinois and 259,944 pounds in the Southern division of the State.

The average price of 3 cents per pound gives a total value of \$16,661.

The following table gives particulars concerning the grape crop of the State for the past thirty-two years:

YEAR.	Pounds produced.	Price per pound.	Value of crop.
1877.....	3,002,748	\$0 03	\$92,782

WINE.

The area in vineyards this year—854 acres—is 4 per cent less than in 1907. There were 22,474 gallons of wine produced in 1908, being an average of 26 gallons per acre.

The average price per gallon was 85 cents, the total value of the product at this price being \$19,489.

The following table gives the number of gallons of wine and the value thereof during the past thirty-two years:

YEAR.	Acreage.	Av. yield per acre— gallons.	Number of gallons produced.	Price per gallon.	Value of crop.

STRAWBERRIES.

The value of the strawberry crop for 1908 was reported as being \$29,947 of which \$13,179 was reported from northern Illinois, \$1,008 from central Illinois and \$15,760 from the southern division of the State.

WATERMELONS.

The value of watermelons sold in northern Illinois is reported as \$28,139, in central Illinois \$4,522, in southern Illinois \$2,613, a total value of \$35,274.

BEES AND HONEY.

There were 342,374 pounds of honey produced in 1908.

The average price obtained for that sold was 14 cents per pound, making the total value \$47,063.

The total number of hives of bees reported for 1908 was 52,736.

The following table gives the amount and value of honey produced in this State during the past eighteen years, together with the number of hives of bees:

YEAR.	Pounds produced.	Price per pound.	Value of product.	Number of hives of bees.
1891.....	821,678	\$0 14	\$112,934	120,252

LIVE STOCK.

HOGS.

According to the assessors' returns, there were 1,838,690 hogs in the State May 1, 1908. At the equalized value of \$1.14 per head, they were worth \$2,096,107.

The number marketed was 1,526,112, or 83 per cent. of the whole number. The average weight of those marketed was 204 pounds, giving a total gross weight of 311,081,317 pounds. The average price per hundred weight of hogs marketed was \$5.40, their value at this rate being \$16,860,942.

The supply of hogs on hand December 1, was 80 per cent. and the average price per hundred weight on that date, \$5.25.

Hog cholera is reported from Boone, Bureau, Grundy, Henderson, Henry, Lee, Livingston, Mercer, Peoria, Rock Island, Stark, Whiteside, Adams, Brown, Cass, Edgar, Hancock, McDonough, Morgan, Pike, Schuyler, Johnson, Marion, Monroe, Washington and White counties.

The following table gives the number of hogs assessed and marketed in 1908, as well as their weight and value, for the past fifty-three years:

YEAR.	Assessors' Returns.		Estimated per cent marketed.	Number fat hogs marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value hogs marketed.

BEEF CATTLE.

The number of cattle in the State May 1, 1908, according to assessors' returns, was 1,892,118. At the equalized value of \$4.63 per head, they were worth \$8,760,506. About 23 per cent. of the whole, or 435,186 were marketed during the year.

The average weight was 1,085 pounds, making their total weight 472,389,045 pounds.

The average price of those sold prior to December 1, was \$4.65 per hundred weight, a total value of \$22,043,905.

The supply of beef cattle on hand December 1, 1908 was 76 per cent, and the average price per hundred weight on that date was \$4.50.

Grundy county reports some milksickness among cattle.

The following table gives the number, weight and value of the cattle marketed in the State since 1855:

YEAR	Assessors' Returns.		Estimated per cent marketed.	Number beef cattle marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value beef cattle marketed.

DAIRY COWS.

There were 568,204 dairy cows reported in Illinois in 1908.

The average value per head was \$41 and the total value amounted to \$23,455,636.

Some cows in Randolph county are reported as having foot and tongue disease.

The following table gives the number and value of the dairy cows kept in Illinois since 1878:

YEAR.	Number.	Av. value per head.	Total value.
1879.....	571,628	\$31 00	\$17,720,468

SHEEP.

There were 394,610 sheep reported by assessors this year.

Their equalized value per head is 81 cents, making their total equalized value \$319,634.

Of the number assessed, 22 per cent. or 86,812 were marketed; their average gross weight being 102 pounds, and the total gross weight 8,824,459 pounds. The average price received for those marketed prior to December 1, was \$4.40 per hundred weight, making their total value \$386,635.

The supply of sheep on hand December 1, 1908 was 89 per cent. as compared with last year, and the average price per hundred weight \$4.20.

The following table gives the number, weight and value of the sheep marketed in this State since 1855:

YEAR.	Assessors' Returns.		Estimated per cent marketed.	Number fat sheep marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. GROSS.	Total value sheep marketed.

WOOL.

There were 1,739,654 pounds of wool shorn in 1908.

The average price per pound was 19 cents, and the total value of the wool clip amounted to \$336,831.

The following table gives the number of pounds shorn, the price per pound and the total value of the wool clip for the last thirty-two years:

YEAR.	Number pounds shorn.	Price per pound.	Total value.

HORSES.

The number of horses reported by assessors this year is 988,628 and their equalized value per head \$14.65, the total value amounting to \$14,483,400.

The number of colts foaled in 1907 was 81,288.

Distemper is reported from Douglas, Fulton, Scott, Shelby, Effingham, Marion Lung fever among horses is reported from Morgan county.

The following table gives the number of horses assessed in the State since 1855 and their equalized valuation, as well as the number of colts foaled each year since 1878:

YEAR.	Assessors' Returns.		Number colts foaled.

DAIRY PRODUCTS.

MILK.

There were 99,321,426 gallons of milk sold in 1908.

The average price was 18 cents per gallon, and the total value \$17,431,252.

The following table gives the amount, price and value of the milk sold in the State the past thirty-two years:

YEAR.	Gallons sold.	Price per gallon.	Total value.
1877	17,124,506	\$0 11 1-6	\$1,912,236
1878	30,567,415	10 1/2	3,209,579
1879	96,659,845	08	7,732,788
1880	38,986,861	09 1-6	3,575,796

CREAM.

There were 1,575,223 gallons of cream sold in the State the past year.

The average price per gallon was 75 cents and the total value \$1,187,528.

The quantity and value of the cream sold in the State since 1877 is given in the following table:

YEAR.	Gallons sold.	Price per gallon.	Total value.
1877.....	2,744,259	\$0 55	\$1,509,342
1878.....	62,707	52	32,608

Tables published elsewhere in this report give by counties the quantity and value of the dairy products of the State for 1908.

POULTRY AND EGGS.

The value of the poultry sold in the State in 1908 was \$1,504,094.

In northern Illinois the value of poultry sold was \$882,795, in central Illinois \$385,963 and in the southern division of the State \$235,336.

The value of eggs sold in 1908 in the State is 2 per cent greater than last year.

Northern Illinois reports the value of eggs sold as \$914,436, central Illinois \$338,102 and southern Illinois \$439,678, a total value of \$1,692,216.

SUMMARY.

The following table gives in small space the value of the principal farm products and live stock of Illinois for the year 1908:

Corn	\$121,160,615
Winter wheat	15,211,227
Spring wheat	1,133,209
Oats	31,158,168
Rye	875,626
Barley	470,056
Buckwheat	25,524
Hay	26,242,606
Timothy seed	88,173
Clover seed	207,106
Hungarian and millet seed	12,713
Irish potatoes	4,353,447
Sweet potatoes	222,610
Turnips and other root crops	54,490
Broom-corn	202,570
Sorghum	150,637
Beans	29,286
Castor beans	128,264
Tobacco	127,351
Other crops not named	160,542
Apples	53,674
Peaches	3,142
Pears	835
Grapes	16,661
Strawberries	29,947
Watermelons	35,274
Other fruits and berries	32,145
Wine	19,489
Honey	47,063
*Horses (equalized value)	14,483,400
*Beef cattle (equalized value)	8,760,506
Dairy cows	23,455,636
*Hogs (equalized value)	2,096,107
*Sheep (equalized value)	319,634
Wool	336,831
Milk sold	17,431,252
Cream sold	1,187,528
Butter sold	2,945,993
Cheese sold	150,991
Poultry sold	1,504,094
Eggs sold	1,692,216
Total	\$276,614,637

*NOTE—The equalized value, as fixed by the State Board of Equalization, represents but one-fifth of the actual value.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season and immediately after harvest, when the information as to condition and yield is most needed, to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting conditions, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or 10 per cent, is recorded 110; a decrease of 5 per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for the term of years will be found to closely approximate the assessors' returns.

J. K. DICKIRSON,

Secretary.

CROP REPORT.

NORTHERN DIVISION.	Average 1908.	Average yield in bushels, per acre in 1908.	Total yield in bushels.	Price per bushel.	* Value of crop.	Cost of pro- duction per acre.	Total cost of production. *If the crop had been sold at prevailing prices December 1, it would have returned this amount to the producer.

NAMES AND POSTOFFICE ADDRESSES

—OF—

CROP CORRESPONDENTS

STATE BOARD OF AGRICULTURE

FOR THE YEAR 1908.

WITH DATE OF APPOINTMENT.

ADAMS COUNTY—

1879. G. W. Dean, R. F. D. No. 1,
Adams.
1883. H. C. Cupp, Fall Creek.
1888. C. H. Rankin, Fall Creek.
1904. A. R. Wallace, Jr., Camp Point.

ALEXANDER COUNTY—

1907. J. L. Vick, Diswood.
1907. G. W. Childress, Olive Branch.

BOND COUNTY—

1885. J. B. Denny, Sorento.
1885. W. H. Taylor, Greenville.
1898. L. E. Alexander, Reno.
1904. A. O. Donnell, Greenville, R. R.
No. 1.
1908. N. Cowen, Sorento.

BOONE COUNTY—

1899. O. S. Cohoon, Belvidere.

BROWN COUNTY—

1889. W. B. Rigg, Mt. Sterling.

BUREAU COUNTY—

1897. O. W. Mason, Buda.
1907. D. D. Draper, New Bedford.
1907. Frank J. Nye, Tiskilwa.
1907. John Johnson, Walnut, R. R. D.
No. 4.
1907. E. B. Anthony, Tiskilwa.
1907. W. R. Kitterman, Tiskilwa.

CALHOUN COUNTY—

1881. M. A. Kamp, Kampsville.
1906. J. A. Walston, Kampsville.

CARROLL COUNTY—

1899. Henry Daehler, Chadwick.

CASS COUNTY—

1878. John Beggs, Ashland.
1896. W. W. Mathew, Ashland, R. R.
No. 2.
1903. M. L. Crum, Virginia.

CHAMPAIGN COUNTY—

1908. Dr. F. M. Conkey, Homer.
1885. W. E. Dawley, Seymour, R. F.
D. No. 43.
1907. R. E. Chambers, Sadorus.
1907. Reuben Roughton, Rantoul.

CHRISTIAN COUNTY—

1877. John W. Hunter, Pana.
1877. A. B. Herdman, Morrisonville.
1878. O. S. Nash, Sharpsburg.
1897. Basil Hill, Edinburg.
1904. J. Earle White, Morrisonville.
1908. C. W. Ebert, Owaneco.

CLARK COUNTY—

1880. Jerry Ishler, Martinsville.
1908. D. A. Montgomery, Martinsville.

CLAY COUNTY—

1891. Edgar Hays, Iola.
1902. Israel Mills, Clay City.
1904. Leslie F. Brissenden, Flora.
1904. T. O. Pierce, Xenia.
1904. Jno. T. Campbell, Louisville.

CLINTON COUNTY—

1890. John B. Hiemann, Damiansville.
1901. Frank Bassler, Trenton.
1907. Theo. W. Timmerman, Breese.

COLES COUNTY—

1905. John W. Black, Humboldt.
1905. James A. Walker, Lerna.
1905. E. E. Boyer, Ashmore.

COOK COUNTY—

- 1880. E. Wheeler, Arlington Heights.
- 1907. M. L. Staples, Palatine.
- 1907. John T. Cooper, Orland.
- 1907. C. Doctor, Orland.

CRAWFORD COUNTY—

- 1877. William L. Heustis, Robinson.
- 1882. William F. Wood, Oblong.
- 1897. W. M. Hart, Annapolis.
- 1900. Clinton Newlin, Hutsonville.

CUMBERLAND COUNTY—

- 1882. James M. Albin, Neoga.
- 1887. David B. Green, Toledo.
- 1897. J. L. Mattoon, Greenup.

DE KALB COUNTY—

- 1905. A. J. Plapp, Malta.
- 1906. John L. Storey, Shabbona, R. F. D. No. 2.

DE WITT COUNTY—

- 1882. W. R. Carle, Wapella.
- 1897. W. H. Oglevee, Clinton.
- 1898. C. E. Robb, Clinton.

DOUGLAS COUNTY—

- 1887. William Hes, R. F. D. No. 6, Tuscola.
- 1892. Perry N. Howe, R. F. D. No. 3, Tuscola.

DU PAGE COUNTY—

- 1885. Thomas Betts, Naperville.
- 1904. E. W. Plane, West Chicago.
- 1904. F. A. Rogers, Downers Grove.

EDGAR COUNTY—

- 1892. C. D. Smith, Dudley, R. R. No. 12.
- 1904. F. L. Moss, Edgar.
- 1907. Fred Oliver, Edgar.

EDWARDS COUNTY—

- 1877. W. A. Shelby, West Salem, R. R. No. 1.
- 1889. Ira Gould, Bone Gap.

EFFINGHAM COUNTY—

- 1883. George W. Strong, Dieterich.
- 1883. T. J. Dunn, Dieterich, R. R. No. 2.
- 1902. Chas. Blakely, Altamont.

FAYETTE COUNTY—

- 1892. A. C. Davis, Farina.
- 1907. A. H. Hicks, St. Elmo.

FORD COUNTY—

- 1879. S. J. LeFevre, Gibson City.
- 1892. L. Corbley, Paxton.
- 1892. W. B. Flora, Paxton.
- 1902. E. E. Bishop, Piper City.

FRANKLIN COUNTY—

- 1889. John A. Coleman, West Frankfort.
- 1907. M. V. Webb, Benton, R. R. No. 2.
- 1904. C. M. Upchurch, Ewing.
- 1905. J. F. Ice, West Frankfort.
- 1907. G. D. Dimmick, West Frankfort.

FULTON COUNTY—

- 1878. John Prickett, Lewistown.
- 1903. C. E. Chick, Vermont.
- 1904. Abram Wilson, Fairview.
- 1908. Russell Fluke, Lewistown.

GALLATIN COUNTY—

- 1889. John M. Bowling, Ridgeway.
- 1906. Ed. Rice, Ridgeway.

GREENE COUNTY—

- 1902. L. E. Prindle, Roodhouse.
- 1907. A. J. Johnson, Barrow.
- 1907. J. F. Doyel, Barrow.

GRUNDY COUNTY—

- 1892. Louis Germain, Gardner.
- 1892. Wm. Reardon, Morris.

HAMILTON COUNTY—

- 1887. Geo. K. Edwards, McLeansboro.
- 1889. J. D. Lockwood, McLeansboro.
- 1889. J. M. Weldin, McLeansboro.

HANCOCK COUNTY—

- 1877. E. J. Baxter, Nauvoo.
- 1885. C. M. McMillan, Carthage, R. No. 2.
- 1906. Geo. E. Campbell, La Harpe, R. F. D. No. 2.
- 1907. Fred G. Miner, Plymouth, R. R. No. 1.

HARDIN COUNTY—

- 1907. Henry Hans, Cave-in-Rock.
- 1907. W. M. Siener, Shetlerville.

HENDERSON COUNTY—

- 1898. D. A. Whiteman, Biggsville.
- 1907. Frank Wood, Oquawka.
- 1907. Wm. Hartgrow, Oquawka.
- 1907. L. E. Van Arsdale, Stronghurst.
- 1908. E. C. Hutton, Terre Haute.

HENRY COUNTY—

- 1889. Horace S. Gilbert, Geneseo.
- 1908. D. S. Brown, Geneseo, R. R. No. 3.

IROQUOIS COUNTY—

- 1879. Robert Caldwell, Sheldon.
- 1897. Herman Salmon, Milford, R. R. No. 2.
- 1908. John Fry, Donovan, R. R. No. 2.

JACKSON COUNTY—

- 1904. H. G. Easterly, Carbondale.
- 1904. Peter W. Griffith, Murphysboro.
- 1907. A. W. Williams, Ava.
- 1907. J. B. Williamson, Ava.
